Federal Probation ,2001 [The Crypto Controversy:A Key Conflict in the Information Society](#) Bert-Jaap Koops,1999-01-01 Cryptography is essential for information security and electronic commerce yet it can also be abused by criminals to thwart police wiretaps and computer searches How should governments address this conflict of interests Will they require people to deposit crypto keys with a trusted agent Will governments outlaw cryptography that does not provide for law enforcement access This is not yet another study of the crypto controversy to conclude that this or that interest is paramount This is not a study commissioned by a government nor is it a report that campaigns on the electronic frontier The Crypto Controversy is neither a cryptography handbook nor a book drenched in legal jargon The Crypto Controversy pays attention to the reasoning of both privacy activists and law enforcement agencies to the particulars of technology as well as of law to solutions offered both by cryptographers and by governments Koops proposes a method to balance the conflicting
