Inclusive Education for the 21st Century Linda Graham,2020-07-16 Placing a student on the autism spectrum in a busy classroom with a pair of noise cancelling headphones and an aide to deal with the inevitable meltdowns is often done in the name of inclusion but this is integration and not inclusive How can teachers and schools create genuinely inclusive classrooms that meet the needs of every student Research evidence indicates the strategies that make schools inclusive for students with disability benefit all students Yet many schools are still operating under twentieth century models that disadvantage students especially those with disability Inclusive Education for the 21st Century provides a rigorous overview of the foundational principles of inclusive education and the barriers to access and participation It explores evidence based strategies to support diverse learners including specific changes in curriculum pedagogy and assessment practices and the use of data It addresses the needs of children with physical sensory and intellectual disabilities as well as those with complex learning profiles including mental health issues With chapters from leading experts from Australia and the UK Inclusive Education for the 21st Century addresses common issues in both primary and secondary schools Underpinned throughout by research evidence it is designed to assist educators to develop the deep knowledge required to make inclusive education a reality in all schools

Innovation and Modernisation in Contemporary Russia Imogen Sophie Kristin Wade,2022-07-29 This book examines how technological modernisation and innovation policies have been implemented in Russia from the Soviet era to the present day It discusses how since about 2000 the Russian state has attempted to address the country s excessive dependence on natural resources by implementing an ambitious programme of economic modernisation including giving innovation more policy prominence boosting state funding for research and development and innovation and emphasising science towns and technology parks as key instruments for stimulating innovation Based on extensive original research

taking a multidisciplinary approach and including detailed case studies the book explains why despite these efforts Russia is performing comparatively poorly in innovation outcomes It argues that a key factor is the country s political economy model in which science technology and innovation policies are mainly controlled and funded by the federal centre of power and led by domestic political and economic elites
