

HOW TO READ A SAFETY DATA SHEET

OSHA Brief:

OSHA requires that the chemical manufacturer, distributor, or importer provide Safety Data Sheets (SDSs) for hazardous chemicals. OSHA requires that each hazardous chemical to be transported must be accompanied by an SDS. The information contained in the SDS is largely the same as the MSDS, except that the SDS is required to be provided in a condensed user-friendly, 28-section format. This new format provides guidance to help workers who handle hazardous chemicals to become familiar with the format and understand the contents of the SDSs.

The SDS is required to be provided in a condensed user-friendly format, the physical, health, and environmental health hazards, protective measures, and safety procedures for handling, storing, and transporting the chemical. The information contained in the SDS is required to be provided in a condensed user-friendly, 28-section format. OSHA requires that SDSs prepared provide specific minimum information as detailed in Appendix C-2 of 29 CFR (29 CFR 1910.1200). The SDSs prepared may also include additional information as required by the GHS.

Sections 1 through 8 contain general information about the chemical, identification, hazards, composition, safe handling practices, and emergency control measures (e.g., first aid). This information should be helpful to those that need to get the information quickly. Sections 9 through 11, and 28 contain other technical and scientific information such as physical and chemical properties, stability and reactivity information, toxicology, and environmental fate. Sections 12 through 15 contain information about the date of preparation of the SDS. The SDS must also state that no applicable information was found when the preparer does not find relevant information for any chemical. The SDS must also contain Sections 12 through 15, to be consistent with the GHS Globally Harmonized System of Classification and Labeling of Chemicals (GHS), but OSHA will not consider the content of these sections because they contain information. A description of all 28 sections of the SDS, along with their contents, is presented below.

Section 1: Identification

This section identifies the chemical on the SDS as well as the recommended use. It also provides the recommended use of the chemical.

- Product identifier used on the label and any other names or synonyms by which the substance is known.
- Name, address, phone number of the manufacturer, distributor, or other responsible party, and emergency phone number.
- Recommended use of the chemical (e.g., a first aid kit, a cleaning agent, or a disinfectant).
- Any restrictions on use (e.g., labeling restrictions).

Section 2: Hazard(s) Identification

This section contains the hazards of the chemical on the SDS and the appropriate warning information associated with those hazards. The required information consists of:

- The hazard classification of the chemical (e.g., flammable liquid, category 2).
- Signal word.
- Hazard statement(s).
- Pictograms (the pictograms or hazard symbols may be presented as graphical reproductions of the symbols in black and white or as a description of the name of the symbol (e.g., skull and crossbones, flame).
- Precautionary statement(s).
- Description of any hazards not otherwise classified.

Section 3: Ingredients Information

This section provides information on the ingredients of the chemical on the SDS, including impurities and stabilizing additives. This section includes information on substances, mixtures, and all chemicals where a trade secret is claimed. The required information consists of:

- Chemical name and synonyms.
- Chemical Abstracts Service (CAS) number and other unique identifiers.
- Impurities and stabilizing additives, which are themselves classified and which contribute to the hazard classification of the chemical.
- Substances.
- Some information required for substances:
 - The chemical name and concentration (i.e., exact percentage) of all ingredients which are classified as health hazards and are present above their cut-off concentration limits.
 - There is a high risk of exposure to the ingredients.
 - The concentration (exact percentage) of each ingredient must be specified except concentration ranges may be used in the following situations:
 - Each ingredient is made.
 - There is both a batch variation, or
 - The SDS is used for a group of substantially similar mixtures.
 - Details where a trade secret is claimed.
 - A statement that the specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret is required.

Section 4: First-Aid Measures

This section describes the most cases that should be given by personnel responding to an individual who has been exposed to the chemical. The required information consists of:

- Necessary first aid instructions by relevant routes of exposure (inhalation, skin and eye contact, and ingestion).
- Other special or other important symptoms or effects, and any symptoms that are acute or delayed.
- Recommendations for immediate medical care and special treatment needed, when necessary.

Section 5: Fire-Fighting Measures

This section provides recommendations for fighting a fire caused by the chemical. The required information consists of:

- Recommendations of suitable extinguishing equipment, and information about extinguishing equipment that is not appropriate for a particular situation.
- Advice on special hazards that may result from fire during the fire, such as any hazardous combustion products created when the chemical burns.
- Recommendations on special protective measures for firefighters.

Section 6: Accidental Release Measures

This section provides recommendations on the appropriate response to spills, leaks, or releases from containers and releases that may result in personal or environmental exposure to people, properties, or the environment. It may also include recommendations (distinguishing between responses for large and small spills) about the spill response (e.g., spills and releases) and impact on the environment. The required information consists of recommendations for:

- Use of personal precautions (such as removal of ignition sources or providing suitable ventilation) and protective equipment to prevent the release of vapors, gases, and dusts.
- Emergency procedures, including instructions for evacuation, consulting experts, and other special measures.
- Methods and materials used for containment (e.g., covering the drums and capping procedures).
- Cleaning procedures (e.g., appropriate techniques for decontamination, decontamination, cleaning or vacuuming, sufficient materials, and/or equipment required for containment).

Section 7: Handling and Storage

This section provides guidance on the safe handling practices and conditions for safe storage of chemicals. The required information consists of:

- Precautions for safe handling and storage of chemicals, including instructions for safe handling and storage of chemicals, minimizing the release of the chemical into the environment, and providing advice on general hygiene practices (e.g., eating, drinking, and smoking).
- Recommendations on the conditions for safe storage, including any incompatibilities.
- Provide advice on specific storage requirements (e.g., ventilation requirements).

Section 8: Exposure Controls/Personal Protection

This section contains the exposure controls and personal protection measures. The required information consists of:

- Control measures (e.g., ventilation, engineering controls, and other measures) to minimize exposure to the chemical.
- Personal protective equipment (PPE) requirements (e.g., eye, face, and skin protection).
- Precautions for safe handling and storage of chemicals, including instructions for safe handling and storage of chemicals, minimizing the release of the chemical into the environment, and providing advice on general hygiene practices (e.g., eating, drinking, and smoking).
- Recommendations on the conditions for safe storage, including any incompatibilities.
- Provide advice on specific storage requirements (e.g., ventilation requirements).

Section 9: Physical/Chemical Properties

This section identifies physical and chemical properties associated with the chemical. The required information consists of:

- Appearance (physical state, color, etc.).
- Upper/lower flammability or explosive limits.
- Flash point.
- Vapor pressure.
- Color threshold.
- Viscosity.
- pH.
- Relative density.
- Boiling point.
- Melting point.
- Stability.
- Reactivity.
- Decomposition temperature.
- Other relevant properties.

Section 10: Stability and Reactivity

This section describes the reactivity hazards of the chemical and the chemical stability information. This section is broken into three parts: reactivity, chemical stability, and other chemical stability information.

- Reactivity: This section describes the reactivity hazards of the chemical, including information on the chemical's reactivity with water, air, and other substances.
- Chemical stability: This section describes the chemical's stability under various conditions, including information on the chemical's stability under normal ambient temperature and conditions while in storage and being handled.
- Other chemical stability: This section describes the chemical's stability under various conditions, including information on the chemical's stability under various conditions.

Section 11: Toxicological Information

This section contains information on the toxicological effects of the chemical. The required information consists of:

- Information on the chemical's toxicity, including information on the chemical's toxicity to humans, animals, and the environment.
- Information on the chemical's toxicity to humans, including information on the chemical's toxicity to humans, animals, and the environment.
- Information on the chemical's toxicity to humans, including information on the chemical's toxicity to humans, animals, and the environment.

Section 12: Ecological Information

This section provides information on the ecological effects of the chemical. The required information consists of:

- Information on the chemical's ecological effects, including information on the chemical's ecological effects to humans, animals, and the environment.
- Information on the chemical's ecological effects, including information on the chemical's ecological effects to humans, animals, and the environment.
- Information on the chemical's ecological effects, including information on the chemical's ecological effects to humans, animals, and the environment.

Section 13: Disposal Considerations

This section provides information on the disposal considerations for the chemical. The required information consists of:

- Information on the chemical's disposal considerations, including information on the chemical's disposal considerations to humans, animals, and the environment.
- Information on the chemical's disposal considerations, including information on the chemical's disposal considerations to humans, animals, and the environment.
- Information on the chemical's disposal considerations, including information on the chemical's disposal considerations to humans, animals, and the environment.

Section 14: Transport Information

This section provides information on the transport information for the chemical. The required information consists of:

- Information on the chemical's transport information, including information on the chemical's transport information to humans, animals, and the environment.
- Information on the chemical's transport information, including information on the chemical's transport information to humans, animals, and the environment.
- Information on the chemical's transport information, including information on the chemical's transport information to humans, animals, and the environment.

Section 15: Regulatory Information

This section identifies the safety, health, and environmental regulations specific to the chemical. The required information consists of:

- Information on the chemical's regulatory information, including information on the chemical's regulatory information to humans, animals, and the environment.
- Information on the chemical's regulatory information, including information on the chemical's regulatory information to humans, animals, and the environment.
- Information on the chemical's regulatory information, including information on the chemical's regulatory information to humans, animals, and the environment.

Section 16: Other Information

This section provides information on the other information for the chemical. The required information consists of:

- Information on the chemical's other information, including information on the chemical's other information to humans, animals, and the environment.
- Information on the chemical's other information, including information on the chemical's other information to humans, animals, and the environment.
- Information on the chemical's other information, including information on the chemical's other information to humans, animals, and the environment.

Osha Msds Requirements 2013 Introduction

In the digital age, access to information has become easier than ever before. The ability to download Osha Msds Requirements 2013 has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Osha Msds Requirements 2013 has opened up a world of possibilities. Downloading Osha Msds Requirements 2013 provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Osha Msds Requirements 2013 has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Osha Msds Requirements 2013. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Osha Msds Requirements 2013. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Osha Msds Requirements 2013, users should also consider the potential security risks associated with online

platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Osha Msds Requirements 2013 has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
