*The Alphabet and the Algorithm* Mario Carpo, 2011-02-04 The rise and fall of identical copies digital technologies and form making from mass customization to mass collaboration Digital technologies have changed architecture the way it is taught practiced managed and regulated But if the digital has created a paradigm shift for architecture which paradigm is shifting In *The Alphabet and the Algorithm* Mario Carpo points to one key practice of modernity the making of identical copies Carpo highlights two examples of identicity crucial to the shaping of architectural modernity in the fifteenth century Leon Battista Alberti's invention of architectural design according to which a building is an identical copy of the architect's design and in the nineteenth and twentieth centuries the mass production of

identical copies from mechanical master models matrixes imprints or molds The modern power of the identical Carpo argues came to an end with the rise of digital technologies Everything digital is variable In architecture this means the end of notational limitations of mechanical standardization and of the Albertian authorial way of building by design Charting the rise and fall of the paradigm of identicity Carpo compares new forms of postindustrial digital craftsmanship to hand making and the cultures and technologies of variations that existed before the coming of machine made identical copies Carpo reviews the unfolding of digitally based design and construction from the early 1990s to the present and suggests a new agenda for architecture in an age of variable objects and of generic and participatory authorship [The Architectural Model](#) Matthew Mindrup,2019-10-08 An investigation of different uses for the architectural model through history as sign souvenir funerary object didactic tool medium for design and architect s muse For more than five hundred years architects have employed three dimensional models as tools to test refine and illustrate their ideas But as Matthew Mindrup shows the uses of physical architectural models extend beyond mere representation An architectural model can also simulate instruct inspire and generate architectural designs It can be among other things sign souvenir toy funerary object didactic tool medium or muse In this book Mindrup surveys the history of architectural models by investigating their uses both theoretical and practical Tracing the architectural model s development from antiquity to the present Mindrup also offers an interpretive framework for understanding each of its applications in the context of time and place He first examines models meant to portray extant fantastic or proposed structures describing their use in ancient funerary or dedicatory practices in which models are endowed with magical power as a medium for architectural reverie and inspiration and as prototypes for twentieth century experimental designs Mindrup then considers models that exemplify certain architectural uses exploring the influence of Leon Battista Alberti s dictum that models be simple lest they distract from the architect s ideas analyzing the model as a generative tool and investigating allegorical analogical and anagogical interpretations of models Mindrup s histories show how the model can be a surrogate for the architectural structure itself or for the experience of its formal tactile and sensory complexity and beyond that that the manipulation play experimentation and dreaming enabled by models allow us to imagine architecture in new ways [Nemrud Dagi](#) Herman Brijder,2014-08-25 This richly illustrated book presents in detail the sanctuaries built during the reign of Antiochus I of Commagene ca 75 36 BCE including the three large tombs and ten cult places and discusses Antiochus rule in the context of his religious program and cult of the divine ruler This book is the final publication of the results of the International Nemrud Da i Project 2001 2003 [Pindar, Song, and Space](#) Richard Neer,Leslie Kurke,2019-11-05 A groundbreaking study of the interaction of poetry performance and the built environment in ancient Greece Winner of the PROSE Award for Best Book in Classics by the Association of American Publishers In this volume Richard Neer and Leslie Kurke develop a new integrated approach to classical Greece a lyric archaeology that combines literary and art historical analysis with archaeological and epigraphic materials At the heart of the book is the

great poet Pindar of Thebes best known for his magnificent odes in honor of victors at the Olympic Games and other competitions Unlike the quintessentially personal genre of modern lyric these poems were destined for public performance by choruses of dancing men Neer and Kurke go further to show that they were also site specific as the dancers moved through the space of a city or a sanctuary their song would refer to local monuments and landmarks Part of Pindar s brief they argue was to weave words and bodies into elaborate tapestries of myth and geography and in so doing to re imagine the very fabric of the city state Pindar s poems in short were tools for making sense of space Recent scholarship has tended to isolate poetry art and archaeology But Neer and Kurke show that these distinctions are artificial Poems statues bronzes tombs boundary stones roadways beacons and buildings worked together as a suite of technologies for organizing landscapes cityscapes and territories Studying these technologies in tandem reveals the procedures and criteria by which the Greeks understood relations of nearness and distance here and there and how these ways of inhabiting space were essentially political Rooted in close readings of individual poems buildings and works of art Pindar Song and Space ranges from Athens to Libya Sicily to Rhodes to provide a revelatory new understanding of the world the Greeks built and a new model for studying the ancient world **Encyclopedia of the Ancient Greek World** David Sacks, Oswyn Murray, Lisa R.

Brody,2014-05-14 Discusses the people places and events found in over 2 000 years of Greek civilization **Bridge of the Untiring Sea** Elizabeth R. Gebhard, Timothy E. Gregory, 2015-12-31 Pindar s metaphor of the Isthmus as a bridge spanning two seas encapsulates the essence of the place and gives a fitting title for this volume of 17 essays on the history and archaeology of the area The Isthmus best known for the panhellenic Sanctuary of Poseidon attracted travelers both before and after Pausanias s visit in the 2nd century A D but only toward the end of the 19th century were the ruins investigated and a half century later finally systematically excavated More recently archaeologists have surveyed the territory beyond the sanctuary compiling evidence for a varied picture of activity on the wider Isthmus and the eastern Corinthia The essays in this book celebrate 55 years of research on the Isthmus and provide a comprehensive overview of the state of our knowledge Topics include an Early Mycenaean habitation site at Kyras Vrysi the settlement at Kalamianos the Archaic Temple of Poseidon domestic architecture of the Rachi settlement dining vessels from the Sanctuary of Poseidon the Temple Deposit at Isthmia and the dating of Archaic and Early Classical Greek coins terracotta figurines from the Sanctuary of Poseidon the Chigi Painter arms from the age of Philip and Alexander at Broneer s West Foundation on the road to Corinth new sculptures from the Isthmian Palaimonion an inscribed herm from the Gymnasium Area of Corinth Roman baths at Isthmia and sanctuary baths in Greece Roman buildings east of the Temple of Poseidon patterns of settlement and land use on the Roman Isthmus epigraphy liturgy and Imperial policy on the Justinianic Isthmus and circular lamps in the Late Antique Peloponnese
