**Comprehensive Reviews in Toxicology** Peter D Bryson,1996-09-03 Revised and updated this edition covers general principles of overdose management the autonomic nervous system neurotransmitters and drugs drugs used in psychiatry cardiac drugs agents that burn gases and abnormal haemoglobin formation the *Van Nostrand's Scientific Encyclopedia* Douglas M. Considine,Glenn D. Considine,2013-12-11 Advancements in science and engineering have occurred at a surprisingly rapid pace since the release of the seventh edition of this encyclopedia Large portions of the reference have required comprehensive rewriting and new illustrations Scores of new topics have been included to create this thoroughly updated eighth edition The appearance of this new edition in 1994 marks the continuation of a tradition commenced well over a half century ago in 1938 Van Nostrand's Scientific Encyclopedia First Edition was published and welcomed by educators worldwide at a time when what we know today as modern science was just getting underway The early encyclopedia was well received by students and educators alike during a critical time span when science became established as a major factor in shaping the progress and economy of individual nations and at the global level A vital need existed for a permanent science reference that could be updated periodically and made conveniently available to audiences that numbered in the millions The pioneering VNSE met these criteria and continues today as a reliable technical information source for making private and public decisions that present a backdrop of technical alternatives Particulate Carbon George T. Wolff,2012-12-06 This book contains the papers and discussions from the symposium PARTICULATE CARBON Atmospheric Life Cycle held at the General Motors Research Laboratories on October 13 14 1980 This symposium which focused on atmospheric particulate elemental carbon or soot was the twenty fifth in this series sponsored by the General Motors Research Laboratories The present symposium volume contains discussions of the following aspects of particulate elemental carbon EC the atmospheric life cycle of EC including sources sinks and transport processes the role of EC in atmospheric chemistry and optics the possible role of EC in altering climate and measurement techniques as well as ambient concentrations in urban rural and remote areas Previous symposia have covered a wide range of scientific and engineering subjects Topics are selected because they are new or represent rapidly changing fields and are of significant technical importance It is ironic that the study of particulate elemental carbon or soot should meet the above criteria for selection because soot especially from coal and wood combustion has been a recognized air pollutant for centuries However since the 1950s when intense efforts to study air pollution were initiated to until a few years ago the role of elemental carbon in the atmosphere was largely ignored The major reason for this was the lack of a suitable measurement technique **English Mechanic and Mirror of Science and Art** ,1907 Supplement to Mellor's Comprehensive Treatise on Inorganic and Theoretical Chemistry: suppl. 1, pt. 1.
