Text, Speech, and Dialogue Elmar Nöth, Aleš Horák, Petr Sojka, 2024-08-31 The two volume set LNAI 15048 and 15049 constitutes the refereed proceedings of the 27th International Conference on Text Speech and Dialogue TSD 2024 held in Brno Czech Republic during September 9 13 2024 The 50 revised full papers presented in these deadline proceedings were carefully reviewed and selected from 103 submissions The papers are organized in the following topical sections Part I Text Part II Speech Dialogue **Information Design Unbound** Sheila Pontis, Michael Babwahsingh, 2023-10-05 As everyday

tasks grow more confusing and as social and global problems grow more complex the information designer's role in bringing clarity has reached a new level of importance. In order to have a positive impact they must go beyond conventional approaches to uncover real needs, make insightful connections, and develop effective solutions. *Information Design Unbound* provides a clear, engaging introduction to the field and prepares students to be strategic thinkers and visual problem solvers who can confidently make sense in a changing world. Sheila Pontis and Michael Babwahsingh present a holistic view of information design, synthesizing decades of research, cross-disciplinary knowledge, and emerging practices. The book opens by laying a foundation in the field, first painting the bigger picture of what it is and how it originated, before explaining the scientific and cultural dimensions of how people perceive and understand visual information. A discussion of professional practices, ethical considerations, and the expanding scale of challenges sheds light on the day-to-day work of information designers today. Detailed chapters then delve into the four areas that are integral to all types of information design work: visual thinking, research, sensemaking, and design. The final section of the book puts everything together with detailed project walk-throughs in areas such as icon design, instructions, wayfinding, organizational strategy, and healthcare system change. Written and designed with students' needs in mind, this book brings information design fundamentals to life; exercises allow students to put lessons directly into practice; case studies demonstrate how information designers think and work; and generous illustrations clarify concepts in a visually engaging way. *Information Design Unbound* helps beginning designers build the mindset and skillset to navigate visual communication challenges wherever they may arise.

Spoken Dialogue Systems Kristina Jokinen, Michael McTear, 2022-05-31

Considerable progress has been made in recent years in the development of dialogue systems that support robust and efficient human-machine interaction using spoken language. Spoken dialogue technology allows various interactive applications to be built and used for practical purposes, and research focuses on issues that aim to increase the system's communicative competence by including aspects of error correction, cooperation, multimodality, and adaptation in context. This book gives a comprehensive view of the state of the art techniques that are used to build spoken dialogue systems. It provides an overview of the basic issues, such as system architectures, various dialogue management methods, system evaluation, and also surveys advanced topics concerning extensions of the basic model to more conversational setups. The goal of the book is to provide an introduction to the methods, problems, and solutions that are used in dialogue system development and evaluation. It presents dialogue modelling and system development issues relevant in both academic and industrial environments and also discusses requirements and challenges for advanced interaction management and future research.
