available from the digital and mobile data sources Although business analytics has been rapidly gaining popularity among practitioners and academicians alike in the recent past its conceptual foundation has existed for centuries One of the first forms of business analytics may be statistics whose uses can be traced back at least to the biblical times in ancient Egypt Babylon and Rome The word analytics has come into the foreground in last decade or so The proliferation of the internet and information technology has made analytics very relevant in the current age Analytics is a field which combines data information technology statistical analysis quantitative methods and computer based models into one This all are combined to provide decision makers all the possible scenarios to make a well thought and researched decision The computer based model ensures that decision makers are able to see performance of decision under various scenarios Business analytics has a wide range of application from customer relationship management financial management and marketing supply chain management human resource management pricing and even in sports through team game strategies
