achievements in this field Professor Kuhn's study reveals the way in which Chinese textile technological inventiveness has influenced textile production in other regions of the world and in medieval Europe. It explains how textile technology reached its high point between the tenth and thirteenth centuries and attempts to indicate the reasons for its subsequent relative decline. The development of the textile industry in Europe was a key factor in the rise of capitalism. In the case of China after Sung times textile technology and the organisation of textile labour may help indicate why such a development did not take place in China.
