**Handbook of Reading Disability Research** Anne McGill-Franzen, Richard Allington, 2010-09-17. Bringing together a wide range of research on reading disabilities, this comprehensive Handbook extends current discussion and thinking beyond a narrowly defined psychometric perspective. Emphasizing that learning to read proficiently is a long term developmental process involving many interventions of various kinds all keyed to individual developmental needs, it addresses traditional questions: What is the nature or causes of reading disabilities? How are reading disabilities assessed? How should reading disabilities be remediated? To what extent is remediation possible but from multiple or alternative perspectives? Taking incursions into the broader research literature represented by linguistic and anthropological paradigms as well as psychological and educational research, the volume is on the front line in exploring the relation of reading disability to learning and language, to poverty and prejudice, and to instruction and schooling. The editors and authors are distinguished scholars with extensive research experience and publication records and numerous honors and awards from professional organizations representing the range of disciplines in the field of reading disabilities. Throughout their contributions are contextualized within the framework of educators struggling to develop concrete instructional practices that meet the learning needs of the lowest achieving readers.

**Reading Instruction for Students who are at Risk Or Have Disabilities** William D. Bursuck, Mary Damer, 2007. Organized according to the Reading First categories of reading development and instruction as presented in the report of the National Reading Panel, this exciting and timely new text presents teaching strategies for children at risk including children of poverty, children for whom English is not their primary language, and children with learning and behavioral disabilities. These are the children No Child Left Behind challenges teachers to serve more effectively. The book is more than a list of teaching strategies that are scientifically validated; the scientifically validated practices included are integrated into a systematic teaching process that stresses the use of student outcome data within authentic classroom contexts to guide practice. The teaching strategies have been field tested with at-risk children in both rural and urban teaching settings. Most of the strategies have resulted from work the authors did in their recent four year federally funded model demonstration grant in which they have implemented an extensive reading problem prevention model in grades K-3 in three inner city schools. Thus the teaching strategies in the book are ones that the authors

implemented every day with at risk children not just findings from research articles Features of this First Edition Include Content organized around the five components validated by the National Reading Panel phonemic awareness phonics fluency vocabulary and comprehension Readers learn how to use DIBELS and other curriculum based assessment results for early identification of children at risk of reading failure and to monitor student progress A unique feature is using DIBELS assessments to pinpoint student skill development as they acquire alphabetic principle Accompanying DVD shows teacher explicitly teaching letter sound recognition regular word decoding sight words multisyllable word reading passage reading vocabulary and comprehension Text explains how to use Differentiated Instruction to maximize learning for all students Specific strategies are detailed for implementing Response To Intervention RTI multi tier instruction during the reading block Examines building vocabulary knowledge through direct and indirect teaching strategies Comprehension strategies identified by the National Reading Panel that help students derive meaning from text are emphasized Strategies for individualizing instruction for adolescents and children who are bilingual and or ESL are included within each chapter Effective strategies for managing classroom behavior including instruction groups are provided so that student behavior does not interfere with reading instruction
