British Naval Administration in the Age of Walpole Daniel A. Chatham Dockyard, 1815-1865 Philip MacDougall,2020-11-25 By the end of the Napoleonic Wars the seven home dockyards of the British Royal Navy employed a workforce of nearly 16 000 men and some women On account of their size dockyards add much to our understanding of developing social processes as they pioneered systems of recruitment training and supervision of large scale workforces From 1815 1865 the make up of those workforces changed with metal working skills replacing wood working skills as dockyards fully harnessed the use of steam and made the conversion from constructing ships of timber to those of iron The impact on industrial relations and on the environment of the yards was enormous Concentrating on the yard at Chatham the book examines how the day to day running of a major centre of industrial production changed during this period of transition The Admiralty decision to build at Chatham the Achilles the first iron ship to be constructed in a royal dockyard placed that yard at the forefront of technological change Had Chatham failed to complete the task satisfactorily the future of the royal dockyards might have been very different

Balchen's Victory Alan Smith,2023-01-04 This is the story of Admiral Sir John Balchen his life and career and HMS Victory the largest finest ship of the line in the Royal Navy at the time which he commanded when both were lost along with more than 1 000 crew in an October storm in the English Channel in 1744 This is not the Victory of Trafalgar fame however but the First Rate built some thirty years earlier the last Royal Navy three decker to carry bronze cannons and a ship whose poor design may well have contributed to her loss It is also the story of Admiral John Balchen a courageous if not heroic naval officer who saw major engagements and whose legacy in naval development deserves greater recognition Indeed the story of both the ship and her commander their individual and remarkably parallel lives can now be revealed as fundamental catalysts to the revolutionary reforms in naval shipbuilding design and dockyard administration that transformed the Royal Navy after 1745

They were indeed major foundation stones for a navy that delivered the glorious achievements of Nelson Anson Howe Hood Rodney Boscawen and many more in the great pantheon of British naval history that followed their loss The exciting discovery of the wreck of HMS Victory in 2008 the subsequent and continuing public and political wrangling over possible salvage and the 2019 display at Portsmouth of a mighty 42 pounder bronze gun retrieved from the wreck have been the catalyst for this history of the admiral and his ship and anyone with an interest in naval or maritime history whether academic or popular will be fascinated by the facts about the hitherto virtually unknown predecessor of Nelson's great flagship This glorious man and ship odyssey whose intrinsic importance to naval history can now be recognised is richly and compelling told in this important new book Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971 New York Public Library. Research Libraries, 1979

The Professions in Early Modern England Wilfrid Prest, 2023-08-18 First published in 1987

The Professions in Early Modern England highlights the significant role of professional and quasi professional occupations in English society before the industrial revolution contrary to what was once historiographical and sociological orthodoxy The editorial introduction provides an overview of the history of the professions as a distinct field of scholarly investigation suggesting that neither historians nor social theorists have adequately mapped or explained the rise of the professions to their present place in modern societies The following chapters bring together original contributions by researchers who have made a close study of various occupational groups over the period c 1500-1750 Besides the traditional learned professions and their practitioners in the church medicine and the law they survey occupations generally lacking institutional coherence school teachers estate stewards and those following the profession of arms This book remains of interest to students of history literature and sociology

Utmost Gallantry Kevin D McCranie, 2011-11-15 Focusing on the oceanic war rather than on the war in the Great Lakes this study charts the War of 1812 from the perspectives of the two opposing navies at sea one

the largest navies in the world the other a small upstart navy just three decades old While American naval leadership searched for a means of contesting Britain's naval dominance the English sought to destroy the U.S. Navy and protect its oceanic highways Instead of describing battles between opposing warships Kevin McCranie evaluates entire cruises by American and British men of war noting both successes and failures and how they translated into broader strategies In the process his study becomes a history of how the two navies fought the oceanic war linking high level governmental decisions about strategy to the operational use of fleets in the Atlantic and Caribbean and from the south Pacific to the Indian Ocean This comprehensive work offers a balanced appraisal of the sea war taking into account the strategic considerations of both sides and how the leadership from each side assessed planned and implemented operational concepts It draws on a wealth of British and American archival sources to help the reader understand strategic imperatives and the correlation between these imperatives and why the oceanic war was conducted in the manner it was All American warships cruises not just those that resulted in battles are covered but the author's action packed accounts of battles hold special appeal
