This field manual provides the information needed to train and equip snipers and to aid them in their missions and operations. It is intended for use by commanders, staff, trainers, snipers, and soldiers at training posts, Army schools, and units. A sniper is a military paramilitary marksman who engages targets from positions of concealment or at distances exceeding the target's detection capabilities. Snipers generally have specialized training and are equipped with high precision rifles and high magnification optics and often also serve as scouts, observers, feeding tactical information back to their units or command headquarters. In addition to long range and high grade marksmanship, military snipers are trained in a variety of special operation techniques: detection, stalking, target range estimation, methods, camouflage, tracking, bushcraft, fieldcraft, infiltration, special reconnaissance, and observation, surveillance, and target acquisition. Snipers need to have complete control of their bodies and senses to be effective. They also need to have the skill set to use data from their scope and monitors to adjust their aim to hit targets that are extremely far away. In training, snipers are given charts that they are drilled on to ensure they can make last minute calculations when they are in the field. **Sniper Training FM 23-10**

Department of the Army, 2014-11-01. The United States Army sniper is a specially selected volunteer, highly trained in advanced marksmanship and fieldcraft skills. He can support special operations missions and is able to engage selected targets from concealed positions at ranges and under conditions that are not possible for the normal rifleman. The sniper's skill acts as a force multiplier where the mission is two fold: 1 to eliminate high value tactical targets on the battlefield and 2 to act as observer, gathering intelligence. Field Manual 23-10 provides doctrinal guidance on the mission, personnel organization, equipment, training skills, and employment of the sniper. This manual is intended for use by commanders, staffs, instructors, and soldiers at training posts, United States Army schools, and units. FM 23-10 addresses three distinct audiences:

Commanders: It provides specific guidance on the nature, role, candidate selection, organization, and employment of sniper personnel. Trainers: It provides a reference for developing training programs for snipers. It contains detailed information on the fundamental knowledge, skills, and employment methods of snipers throughout the entire operational continuum. *The Ultimate Sniper* Major John Plaster, 2006-01-01. Through revised text, new photos, specialised illustrations, updated charts, and additional information sidebars, *The Ultimate Sniper* once again thoroughly details the three great skill areas of sniping.
