Electric Power System Basics for the Nonelectrical Professional Steven W. Blume, 2016-11-21 The second edition of

Steven W Blume's bestseller provides a comprehensive treatment of power technology for the non electrical engineer working in the electric power industry. This book aims to give non electrical professionals a fundamental understanding of large interconnected electrical power systems better known as the Power Grid with regard to terminology, electrical concepts, design considerations, construction practices, industry standards, control room operations for both normal and emergency conditions, maintenance, consumption, telecommunications, and safety. The text begins with an overview of the terminology and basic electrical concepts commonly used in the industry, then it examines the generation, transmission, and distribution of power. Other topics discussed include energy management, conservation of electrical energy, consumption characteristics, and regulatory aspects to help readers understand modern electric power systems. This second edition features new sections on renewable energy, regulatory changes, new measures to improve system reliability, and smart technologies used in the power grid system. Updated practical examples, photographs, drawings, and illustrations to help the reader gain a better understanding of the material. Optional supplementary reading sections within most chapters to elaborate on certain concepts by providing additional detail or background.

Electric Power System Basics for the Nonelectrical Professional
Second Edition gives business professionals in the industry and entry level engineers a strong introduction to power technology in non technical terms. Steve W Blume is Founder of Applied Professional Training Inc, APT Global LLC, APT College LLC, and APT Corporate Training Services LLC, USA. Steve is a registered professional engineer and certified NERC Reliability Coordinator with a Master's degree in Electrical Engineering specializing in power and a Bachelor's degree specializing in Telecommunications. He has more than 25 years experience teaching electric power system basics to non electrical professionals. Steve's engineering and operations experience includes generation, transmission, distribution, and electrical safety. He is an active senior member in IEEE and has published two books in power systems through IEEE and Wiley.
