# BASIC ELECTRICAL MAINTENANCE

**PLIERS** – they are mainly used for cutting wire, or gripping, twisting, bending or straightening wires.

**SCREWDRIVERS** – Electricians use a variety of another toolbox necessity, for loosening and fastening various pieces of hardware.

### TYPES OF SCREWDRIVERS

\***Flat-head screwdriver**, a screwdriver designed to turn slotted screws. Flat head screw, a screw, a screw with a flat top, designed to be installed.

\***Phillips screwdriver** is a screwdriver that is designed to be used with a type of screw (called, a Phillips-head screw) that has a flat or slot in its top that looks like a cross.

**TAPE MEASURE** – when working with wiring, it's essential to know exact measurements when cutting and stripping. Models with magnetic tips, multi-step locks, and other features make this process easier.

**ELECTRICAL TAPE** – Made from plastic, vinyl, or fiberglass cloth, this adhesive material is pressure sensitive and essential for insulating wires or other materials that conduct electricity.

**RUBBER OR FRICTION TAPE** – A cloth or plastic adhesive tape, containing a moisture-resistant substance, used especially to insulate and protect electrical wires and conductors.

**CABLE TIES** – also known as zip ties, these inexpensive fasteners are great at binding electrical cables or wires together. Keep your electrical space neat and organized with cable.

**ELECTRIC DRILL** – Electricians regularly install new lighting fixtures or need to disassemble installed hardware to access wiring and other electrical components. It helps expedite these tasks – and allows professionals to affix specialty bits (like the reaming bit, see below) for industry-specific purpose.

**LEVEL** – It helps electricians ensure fixtures, screws, and other installations are placed exactly where they need to be.

### ESSENTIAL ELECTRICIAN TOOLS

**WIRE/CABLE LUGS** – Similar to the features used on jumper cables and car batteries, wire and cable lugs connect wires to appliances, cables, and other devices in need of power.

**WIRE STRIPPERS** – Professional electricians regularly strip the plastic coating on wires to expose the copper and make customized connections with other wiring or components.

**FISH TAPE** – It's used to run wiring between ganging boxes (or other electrical components) through conduit piping.
