

Documentary Research Strategy to Research Canada

Documentary Research: Ethnographic ethnography	1. Research aims Documentary Research aims to collect and analyze the documentary evidence to understand the social and cultural context of the phenomenon being studied. This is achieved by identifying the key actors, institutions, and processes that shape the phenomenon and by understanding the power relations that govern the production and circulation of documents. 2. Research design Documentary Research is a qualitative research design that involves the collection and analysis of documents. The design is typically inductive, meaning that the researcher starts with a broad understanding of the phenomenon and then narrows it down to specific areas of interest. The design is also typically exploratory, meaning that the researcher is looking for new insights and understanding rather than testing a specific hypothesis. 3. Data collection Documentary Research involves the collection of documents from a variety of sources. These sources may include archives, libraries, museums, government records, newspapers, magazines, books, and other published and unpublished documents. The researcher may also collect documents from individuals or organizations that are involved in the phenomenon being studied. 4. Data analysis Documentary Research involves the analysis of the collected documents. This is typically done using a combination of content analysis and grounded theory. Content analysis involves identifying and coding the themes and topics that are present in the documents. Grounded theory involves developing a theoretical framework that is based on the data. The researcher may also use other methods of analysis, such as discourse analysis and narrative analysis. 5. Research findings Documentary Research findings are typically presented in a narrative form. The researcher describes the key actors, institutions, and processes that shape the phenomenon and the power relations that govern the production and circulation of documents. The researcher also discusses the implications of the findings for the understanding of the phenomenon and for the development of policy and practice.
