Advances Humanitarian Operations International Management:

Advances in Managing Humanitarian Operations Christopher W. Zobel, Nezh Altay, Mark P. Haselkorn, 2015-12-17 This volume provides a survey of current research problems and results in humanitarian operations research. Additionally, it discusses existing applications of humanitarian operations research and considers new research efforts that clearly extend existing research and applications. The book is divided into three sections that provide an overview of the subject, a look at the theory, and an examination of applications. The overview section presents chapters on modeling approaches and metrics to evaluate nonprofit operations, chief findings of fieldwork research in disaster response logistics, the use of cash as a form of relief, and measuring markets that supply cash-based humanitarian interventions. The theory section includes chapters that examine the partner proliferation problem in disaster response networks, a case study of humanitarian logistics that examines how humanitarian culture informs change adoption, and a look at the current state of the art for information visibility in humanitarian operations. Finally, the application section focuses on blood products, vaccines, and food assistance, with individual chapters on efficient inventorying and distribution of blood products during disasters, a detailed look at modeling in the context of the vaccine supply chain, a framework for achieving equity, effectiveness, and efficiency in food bank operations, and a spatio-temporal vulnerability assessment of the resilience of a population affected by sudden lack of food.

Handbook on the Sustainable Supply Chain Joseph Sarkis, 2019 Supply chain management has long been a feature of industry and commerce, but with increasing demands from consumers, producers are spending more time and money investing in ways to make supply chains more sustainable. This exemplary Handbook provides readers with a comprehensive overview of current research on sustainable supply chain management. *Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation* Intergovernmental Panel on Climate Change, 2012-05-28 Extreme weather and climate events interacting with exposed and vulnerable human and natural systems can lead to disasters. This Special Report explores the social as well as physical dimensions of weather and climate-related disasters, considering opportunities for managing risks at local to international scales. SREX was approved and accepted by the Intergovernmental Panel on Climate Change, IPCC, on 18 November 2011 in Kampala, Uganda. **Planning for Intervention: International**

Cooperation in Conflict Management Antonia Chayes, Abram Chayes, 1999-02-15 This important volume by two renowned scholars offers a radical and original strategy to change the way the problem of intervention into internal state conflicts is handled by the world community of nations. Planning for Intervention examines both the failures and successes of intervention by the international community into the internal conflicts that are plaguing the post-Cold War world. It examines the legal framework and the bureaucratic and political realities that govern intervention and helps to explain why performance has been so uneven. **OECD Journal on Development**, 2009 *Developments*, 2006 *White Paper ... on the Security of the Federal Republic of Germany and on the State of the German Federal Armed Forces* Germany (West).
