Daily Report ,1996 *Službeni list Socijalističke Republike Bosne i Hercegovine* Bosnia and Hercegovina,1975 Evil Doesn't Live Here Daoud Sarhandi,Alina Boboc,2001-12 For most Americans and Europeans the Bosnian War was played out in the brief flickering images of television news But another set of images more permanent and more profound played an active role in this war molding public sentiment and calling attention to the plight of the Bosnian people For three hellish years Bosnians plastered the walls of their towns with messages of anger frustration desperation resistance and hope These extraordinary images the focus of this book are juxtaposed with the hateful divisive works of propaganda that served the most vicious practitioners of ethnic cleansing Evil Doesn't Live Here presents this visual battle to the rest of the world for the first time Former Bosnian aid workers Daoud Sarhandi and Alina Boboc have gathered over 180 of the most dramatic wartime posters largely created by Bosnian artists and graphic designers at the height of the war Fascinating on both political and artistic levels they provide a harrowing account of the war and put a human face on this seemingly incomprehensible conflict David Rohde author of the acclaimed *Endgame The Betrayal and Fall of Srebrenica* and winner of the 1996 Pulitzer Prize for his coverage of the Bosnian War introduces this vivid and unforgettable collection which will appeal as much to those interested in current affairs as designers and artists A portion of the proceeds from this book will be donated to victims of the Bosnian War **Bosnia and the Destruction of Cultural Heritage** Helen Walasek,contributions by Richard Carlton,Amra Hadžimuhamedović,Valery Perry,Tina Wik,2016-03-03 The massive intentional destruction of cultural heritage during the 1992 1995 Bosnian War targeting a historically diverse identity provoked global condemnation and became a seminal marker in the discourse on cultural heritage It prompted an urgent reassessment of how cultural property could be protected in times of conflict and led to a more definitive recognition in international humanitarian law that destruction of a people's cultural heritage is an aspect of genocide Yet surprisingly little has been published on the subject This wide ranging book provides the first comprehensive overview and critical analysis of the destruction of Bosnia Herzegovina's cultural heritage and its far reaching impact Scrutinizing the responses of the international community during the war including bodies like UNESCO and the Council of Europe the volume also analyses how after the conflict ended external agendas impinged on heritage reconstruction to the detriment of the broader peace process and refugee return It assesses implementation of Annex 8 of the Dayton Peace Agreement a unique attempt to address the devastation to Bosnia's cultural heritage and examines the treatment of war crimes involving cultural property at the International Criminal Tribunal for the former Yugoslavia ICTY With numerous case studies and plentiful illustrations this important volume considers questions which have moved to the foreground with the inclusion of cultural heritage preservation in discussions of the right to culture in human rights discourse and as a vital element of post conflict and development aid **CMBEBIH 2021** Almir Badnjevic,Lejla Gurbeta Pokvić,2021-05-31 This book presents cutting edge research and developments in the field of

medical and biological engineering It gathers the proceedings of the International Conference on Medical and Biological Engineering CMBEBIH 2021 held partly virtually partly physically on April 21-24 2021 from and in Mostar Bosnia and Herzegovina Focusing on the goal to Stay Focused contributions report on both basic and applied research in a wide range of related fields such as biomedical signal processing medical physics and imaging biosensors and micro nanotechnologies biomaterials biomechanics and robotics cardiorespiratory endocrine and neural systems engineering Novel models methods and technologies for bio and health informatics as well as applications of machine learning and AI in health care and advances in genetic engineering are also highlighted All in all this book provides academics and professionals with novel practical solutions to solve the current problems in biomedical research and applications and a source of inspiration for improving medicine and health care in the future
