Advances in Intelligent Tutoring Systems Roger Nkambou,Riichiro Mizoguchi,Jacqueline Bourdeau,2010-09-21 May the Forcing Functions be with You The Stimulating World of AIED and ITS Research It is my pleasure to write the foreword for Advances in Intelligent Tutoring Systems This collection with contributions from leading researchers in the field of artificial intelligence in education AIED constitutes an overview of the many challenging research problems that must be solved in order to build a truly intelligent tutoring system ITS The book not only describes some of the approaches and techniques that have been explored to meet these challenges but also some of the systems that have actually been built and deployed in this effort As discussed in the Introduction Chapter 1 the terms AIED and ITS are often used interchangeably and there is a large overlap in the researchers devoted to exploring this common field In this foreword I will use the term AIED to refer to the search area and the term ITS to refer to the particular kind of system that AIED researchers build It has often been said that AIED is AI complete in that to produce a tutoring system as sophisticated and effective as a human tutor requires solving the entire gamut of artificial intelligence research AI problems

Cognitive Tutor Ninni Singh,Vinit Kumar Gunjan,Jacek M. Zurada,2022-09-17 This book illustrates the design development and evaluation of personalized intelligent tutoring systems that emulate human cognitive intelligence by incorporating artificial intelligence Artificial intelligence is an advanced field of research It is particularly used in the field of education to increase the effectiveness of teaching and learning techniques With the advancement of internet technology there is a rapid growth in web based distance learning modality This mode of learning is better known as the e learning system These systems present low intelligence because they offer a pre identified learning frame to their learners The advantage of these systems is to offer to learn anytime and anywhere without putting emphasis on a learner's needs competency level and previous knowledge Every learner has different grasping levels previous knowledge and preferred mode of learning and hence the learning process of one individual may significantly vary from other individuals This book provides a complete reference for students researchers and industry practitioners interested in keeping abreast of recent advancements in this field It encompasses cognitive intelligence and artificial intelligence which are very important for deriving a roadmap for future research on intelligent systems

Handbook of Research on Artificial Intelligence in Government Practices and Processes Saura, Jose Ramon,Debasa, Felipe,2022-03-18 In today's global culture where the internet has established itself as a main tool of communication the global system of economy and regulations as well as data and decisions based on data analysis have become essential for public actors and institutions Governments need to be updated and use the latest technologies to understand what society's demands are and user behavioral data which can be pulled by intelligent applications can offer tremendous insights into this The Handbook of Research on Artificial Intelligence in Government Practices and Processes identifies definitional perspectives of behavioral data science and what its use by governments means for automation predictability and risks to privacy and free decision making in society Many

governments can train their algorithms to work with machine learning leading to the capacity to interfere in the behavior of society and potentially achieve a change in societal behavior without society itself even being aware of it As such the use of artificial intelligence by governments has raised concerns about privacy and personal security issues Covering topics such as digital democracy data extraction techniques and political communications this book is an essential resource for data analysts politicians journalists public figures executives researchers data specialists communication specialists digital marketers and academicians
