such questions as the following in depth What existing copyright schemes provide an alternative to the exclusive right in copyright law What online rights apply to the activities of Internet users What types of models exist for the legalisation of online use of copyright works How can the public interest shape the scope of protection of copyright Can and should we legalise non commercial file sharing and online use in EU copyright law The book carefully examines these questions in light of EU primary law relevant directives with a focus on the InfoSoc Directive case law especially that of the CJEU and legal literature in the field of copyright The analysis culminates with a proposed blueprint for a compensated limitation for non commercial individual use that is consistent with EU copyright law As a thoroughly researched and balanced response to the urgent need to rethink EU copyright law in light of its lack of social acceptance and technological adequacy this book will be of inestimable value to lawyers policymakers and scholars in the field as well as to interest groups involved in discussions for reform and modernisation of EU digital copyright law
