[The Accidental Administrator](#) Don R. Crawley, 2010 Newly updated on June 17 2014 with a major revision to RHEL CentOS version 6.5 Get the Kindle edition for free when you purchase the paperback edition. The Accidental Administrator Linux Server Step by Step Configuration Guide is packed with 54 hands on step by step exercises and 185 graphics including screen captures showing you exactly what you should be seeing on your own screen. It's the most straight forward visual approach to learning how to configure a Red Hat CentOS Linux server filled with practical tips and secrets learned from years of teaching, consulting and administering Linux servers. There's no time wasted on boring theory. The essentials are covered in chapters on installing, administering, user management, file systems and directory management, networking, package management, automated task scheduling, network services including DHCP and DNS, Samba, NFS, mail servers, Web and FTP servers, SSH security, firewalls, NAT, performance monitoring, management tools and more. Inside this concise step by step guide you'll find: Where to find and legally download the free server software; How to build and configure an Apache Web server including virtual hosts; How to configure file and printer sharing for Windows clients with Samba; How to understand Linux file and directory permissions. With hands on exercises using virtualization, VMWare is used in the book but other virtualization environments will work equally as well. This book is perfect for both individuals working by themselves or for groups such as classes and users groups. All the information is presented in a straightforward yet casual style that you can understand and use right away. This practical book makes it possible for you to build a working Linux server in a matter of minutes. Of course some of the more advanced configs may take a little longer but even so you'll be able to get it done in a minimal amount of time.

[Cisco ASA for Accidental Administrators](#) Don R. Crawley, 2015-03-04 Cisco ASA for Accidental Administrators is a major update to the previous Accidental Administrator ASA book. This new edition is packed with 48 easy to follow hands on exercises to help you build a working firewall configuration from scratch. Based on software version 9.x it continues as the most straight forward approach to learning how to configure the Cisco ASA Security Appliance filled with practical tips and secrets learned from years of teaching and consulting on the ASA. There is no time wasted on boring theory. The essentials are covered in chapters on installing, backups and restores, remote administration, VPNs, DMZs, usernames, transparent mode, static NAT, port address translation, access lists, DHCP, password recovery, logon banners, AAA, authentication, authorization and accounting, filtering, content and more. Inside this concise step by step guide you'll find: How to backup and restore software images and configurations; How to configure different types of VPNs including AAA authentication; The secrets to successfully building and implementing access lists. All this information is presented in a straight forward style that you can understand and use right away. The idea is for you to be able to sit down with your ASA and build a working configuration in a matter of minutes. Of course some of the more advanced configs may take a little longer but even so you'll be able to get it done in a minimal amount of time.
