Part II: An in-depth look at emission characterization, health, and environmental impacts, testing methods, and global regulations. Part III: A comprehensive overview of diesel fuels, covering petroleum, diesel, alternative fuels, and engine lubricants. Hot, Hotter, Hottest Vivian Howard, 2002-05-14 The YA Hotline is a unique newsletter written by graduate students in the Young Adult Literature and Media Interests class in the School of Library and Information Studies at Dalhousie University. Hot, Hotter, Hottest: The Best of the YA Hotline consists of selected articles from issues 44 to 64. This collection of articles from The YA Hotline is useful not only for YA librarians but also for teachers and other educators and program coordinators working with young adults. *From Critical Science to Solutions* Richard Clapp, 2017-03-02 First Published in 2017. In this volume the editor collected articles that primarily appeared in the Scientific Solutions section of *New Solutions: A Journal of Environmental and Occupational Health Policy*. The articles in the book are grouped into three general categories starting with Critical Science. These articles are primarily critiques of how science is done or how science is incorporated into public health policy in the United States and elsewhere. The second category is what I have called Precautionary Science. These articles such as the ones by Dement on asbestos and Solomon and colleagues on the risks of manganese essentially call for precautionary regulations to reduce exposures where there is substantial but in the eyes of some less than definitive scientific knowledge. The final category is Solutions Science. In some ways this

represents the current stage of precautionary science where we have begun to look at larger societal issues and have moved beyond traditional scientific approaches and critiques Canadian Books in Print ,1999 Uniform Trade List Annual
