Even though there seems to be considerable synergies between the resulting huge data and the convertible knowledge, there is still a debate on how the increasing amount of data captured by corporations could improve decision making and foster innovation through effective knowledge sharing practices. **Big Data and Knowledge Sharing in Virtual Organizations** provides innovative insights into the influence of big data analytics and artificial intelligence and the tools, methods and techniques for knowledge sharing processes in virtual organizations. The content within this publication examines cloud computing, machine learning and knowledge sharing. It is designed for government officials and organizations.
