An International Approach to Developing Early Career Researchers Stephen Gorard, Nadia Siddiqui, 2024-05-14 This edited volume illustrates the idea of a successful research capacity model, critically addressing preconceived notions of early career research projects' impact and drawing together insights and implications around the encouragement of newer researchers to conduct useful robust studies with real world effect. Centring on research undertaken at the UK Durham University Evidence Centre, the volume features contributions from authors based at universities in the US, China, India, and Pakistan. The book discusses 15 substantial studies which explore themes such as children's wider outcomes in school, disadvantage in education, and the supply of professionals for the teaching workforce. Novel in approach and highly interdisciplinary in nature, the book

showcases a broad range of experience and knowledge sharing from experienced researchers and policymakers to new academic staff current doctoral students and masters students conducting ambitious large scale projects thereby giving voice to those just starting out in their career Illustrating powerful studies that are feasible for students and beginners with limited or no resources this book will appeal to new researchers scholars and academics involved in the fields of educational research and research methods continuing professional development and education policy more broadly The Austin Mini and Mini Cooper Workshop Manual (ADO15). Motors, 2003-01-01 **Frontiers in Psychiatry** Yong-Ku Kim, 2019-11-09 This book reviews key recent advances and new frontiers within psychiatric research and clinical practice. These advances either represent or are enabling paradigm shifts in the discipline and are influencing how we observe, derive and test hypotheses and intervene. Progress in information technology is allowing the collection of scattered fragmented data and the discovery of hidden meanings from stored data and the impacts on psychiatry are fully explored. Detailed attention is also paid to the applications of artificial intelligence, machine learning and data science technology in psychiatry and to their role in the development of new hypotheses which in turn promise to lead to new discoveries and treatments. Emerging research methods for precision medicine are discussed as are a variety of novel theoretical frameworks for research such as theoretical psychiatry, the developmental approach to the definition of psychopathology and the theory of constructed emotion. The concluding section considers novel interventions and treatment avenues including psychobiotics, the use of neuromodulation to augment cognitive control of emotion and the role of the telomere/telomerase system in psychopharmacological interventions.
