NATURE

VS

NURTURE

DETERMINISM

Traits like intelligence, personality, and behavior are primarily determined by genetic inheritance.

Behaviour and traits are shaped by external factors like upbringing, culture, and education.

ENVIRONMENT

EVOLUTION

Behaviors and characteristics are shaped by natural selection and are hardwired for survival.

Habits, preferences, and behaviours are learned through reinforcement and experience.

LEARNING

INNATE

Skills and predispositions, such as language acquisition, are inborn and emerge regardless of environment.

Family, peers, and societal norms play a critical role in shaping personality and values.

SOCIETY

TWINS

Research on identical twins often highlights the role of genetics in determining similarities, even when raised apart.

Differences in behaviour and achievement across cultures demonstrate the importance of environmental context.

interactionist views on how children recover from grammatical errors Bünyamin Yuvarlak, 2021-03-23 Seminar paper from the year 2019 in the subject English Language and Literature Studies Linguistics grade 1 3 University of Bonn Institut für Anglistik Amerikanistik und Keltologie course Language Acquisition Psycholinguistik language English abstract This paper aims at exploring how the views on language acquisition have developed over time where they conflict each other and whether it is possible to position oneself on either side The nature vs nurture debate is an everlasting discussion not only in the area of linguistics but science in general This is what makes it particularly interesting because there is always new information to expect Furthermore it is an issue not limited to academic discourse only but one that appears in everyday conversation An interesting aspect of language acquisition more specifically the knowledge of language is the question if children arrive at such knowledge by the mere exposure to positive evidence i.e. the language of adults they are surrounded with or if negative evidence also has an impact i.e. children's knowledge of language is based on explicit or implicit feedback

to whether an utterance was in some way incorrect The two terms will be defined and looked into in more detail in the second chapter In the following the correlation between the nature vs nurture debate and language acquisition will be explained first The respective chapter provides a brief insight into how the nativist approach developed mainly based on Chomsky's 1988 notion of Universal Grammar UG and the type of criticism it brought along It further explains the connection between the respective theories and the grammatical aspect of language acquisition In the last section the main problems of experience based language learning will be displayed and defined The third chapter starts with a section dedicated to where the particular view that humans need innate structures for a correct knowledge of language stems from It continues with a detailed look on the no negative evidence problem The non existence of negative evidence and which role it plays in terms of language acquisition will be explored from different standpoints by nativists as well as non nativists
