Topology of Algebraic Varieties and Singularities José Ignacio Cogolludo-Agustín,Eriko Hironaka,2011 This volume contains invited expository and research papers from the conference Topology of Algebraic Varieties in honour of Anatoly Libgober s 60th birthday held June 22 26 2009 in Jaca Spain **Continued Fractions: From Analytic Number Theory to Constructive Approximation** Bruce C. Berndt,Fritz Gesztesy,1999 This volume presents the contributions from the international conference held at the University of Missouri at Columbia marking Professor Lange s 70th birthday and his retirement from the university The principal purpose of the conference was to focus on continued fractions as a common interdisciplinary theme bridging gaps between a large number of fields from pure mathematics to mathematical physics and approximation theory Evident in this work is the widespread influence of continued fractions in a broad range of areas of mathematics and physics including number theory elliptic functions Pad approximations orthogonal polynomials moment problems frequency analysis and regularity properties of evolution equations Different areas of current research are represented The lectures at the conference and the contributions to this volume reflect the wide range of applicability of continued fractions in mathematics and the applied sciences **Treewidth, Kernels, and Algorithms** Fedor V. Fomin,Stefan Kratsch,Erik Jan van Leeuwen,2020-04-20 This Festschrift was published in honor of Hans L Bodlaender on the occasion of his 60th birthday The 14 full and 5 short contributions included in this volume show the many transformative discoveries made by H L Bodlaender in the areas of graph algorithms parameterized complexity kernelization and combinatorial games The papers are written by his former Ph D students and colleagues as well as by his former Ph D advisor Jan van Leeuwen Chapter Crossing Paths with Hans Bodlaender A Personal View on Cross Composition for Sparsification Lower Bounds is available open access under a Creative Commons Attribution 4 0 International License via link springer com Glencoe Algebra 1 Glencoe,1997-03 Algebra 1 Collins Publishers Staff,William Collins,Gilbert J. based on fundamental realities of modern mathematics as well as his own inner c victions Here we rst refer to an empirical fact of mathematical research All topics have a nite half life with fteen years being an upper bound for most areas After that time it is usually a good idea to move on to so thing new **Microsoft QBasic** David I. Schneider,1991 **Fluid Mechanics and the Environment: Dynamical Approaches** John L. Lumley,2008-01-11 The papers in this volume were written by his students and colleagues to honor Sidney Leibovich Samuel B Eckert Professor in the Sibley School of Mechanical and Aerospace Engineering at Cornell University in commemoration of his 60th birthday 2 April 1999 They were presented at a symposium held at Cornell 23 and 24 August 1999 Sid obtained his Bachelor of Science degree with honors from The California Institute of Technology in 1961 graduating first in his class He came to Cornell to work with Geoffrey Ludford on Magnetohydrodynamics and obtained his Ph D in 1965 in the Department of Theoretical and Applied Mechanics He spent a year at University College London as a NATO Postdoctoral Fellow and returned to Cornell as an Assistant Professor He has been here ever since and is currently Director of the Sibley School Since returning to Cornell Sid has concentrated on rotating fluids and n linear waves in various combinations and applications producing some 3 2 pers a year with an applied mathematical bent In particular this interest led to both Langmuir circulation and vortex breakdown two areas in which Sid has had enormous influence and both of course examples of rotating fluids interacting with waves It was impossible to work in this area without being distracted by the study of the nonlinear dispersive and dissipative waves themselves and Sid has made substantial contributions in this area **To Lester R. monitored by a committee of four There were originally 23 topics for this year s conference The call for papers attracted 343 submissions of which 188 were accepted Of the papers accepted 4 were judged as distinguished 111 as regular and 73 as short papers   *Programming with Data Structures* Robert Leroy Kruse,1989   Birational Geometry, Kähler–Einstein Metrics and Degenerations Ivan Cheltsov,Xiuxiong Chen,Ludmil Katzarkov,Jihun Park,2023-05-23 This book collects the proceedings of a series of conferences dedicated to birational geometry of Fano varieties held in Moscow Shanghai and Pohang The conferences were focused on the following two related problems existence of K hler Einstein metrics on Fano varieties degenerations of Fano varieties on which two famous conjectures were recently proved The first is the famous Borisov Alexeev Borisov Conjecture on the boundedness of Fano varieties proved by Caucher Birkar for which he was awarded the Fields medal in 2018 and the second one is the arguably even more famous Tian Yau Donaldson Conjecture on the existence of K hler Einstein metrics on smooth Fano varieties and K stability which was proved by Xiuxiong Chen Sir Simon Donaldson and Song Sun The solutions for these longstanding conjectures have opened new directions in birational and K hler geometries These research directions generated new interesting mathematical problems attracting the attention of mathematicians worldwide These conferences brought together top researchers in both fields birational geometry and complex geometry to solve some of these problems and understand the relations between them The result of this activity is collected in this book which contains contributions by sixty nine mathematicians who contributed forty three research and survey papers to this volume Many of them were participants of the Moscow Shanghai Pohang conferences while the others helped to expand the research breadth of the volume the diversity of their contributions reflects the vitality of modern Algebraic Geometry   *Function Spaces, Approximations, and Differential Equations* ,2003   *Data Structures and Program Design* Robert Leroy Kruse,1994 For sophomore junior level courses in Data Structures This volume explores top down structured problem solving the process of data abstraction and structuring and the comparative study of algorithms as fundamental tools of program design   **Analysis and Singularities** ,2007   **Local and Global Problems of Singularity Theory** V.
