Teaching the Large College Class Frank Heppner,2007-10-08 Teaching large classes is a fact of life for professors at many institutions In addition to pedagogy instructors of these courses must also be concerned with legal ethical financial technological personnel and management issues Virtually all introductory courses are large ones as are the popular intermediate courses at large institutions Typically little or no training or instruction is provided to new professors about how

to manage large classes successfully This book is a valuable resource for any college teacher adjunct or full time facing a large class It will also be useful for college administrators who might want to issue it to teachers especially adjuncts assigned to large classes for the first time A distillation of years of experience by the author who started his college teaching career in 1969 in teaching large classes and in coaching other professors to do the same this guide is concise and user friendly It employs teaching as acting as a common theme with many practical examples covering all of the major aspects of organizing managing and teaching a large lecture course in any field For more information and excerpts visit www.largelecture.com
