Outsourcing War Amy E. Eckert, 2016-02-19 Recent decades have seen an increasing reliance on private military contractors PMCs to provide logistical services training maintenance and combat troops In *Outsourcing War* Amy E Eckert examines the ethical implications involved in the widespread use of PMCs and in particular questions whether they can fit within customary ways of understanding the ethical prosecution of warfare Her concern is with the *ius in bello* right conduct in war strand of just war theory Just war theorizing is generally built on the assumption that states and states alone wield a monopoly on the legitimate use of force Who holds responsibility for the actions of PMCs What ethical standards might they be required to observe How might deviations from such standards be punished The privatization of warfare poses significant challenges because of its reliance on a statist view of the world Eckert argues that the tradition of just war theory which predates the international system of states can evolve to apply to this changing world order With an eye toward the practical problems of military command Eckert delves into particular cases where PMCs have played an active role in armed conflict and derives from those cases the modifications necessary to apply just principles to new agents in the landscape of war

*The New Dogs of War* Ward Thomas, 2021-09-15 As Ward Thomas details in *The New Dogs of War* militias and paramilitary groups wield greater power than national governments in many countries while in some war zones private contractors perform missions previously reserved for uniformed troops Most ominously terrorist organizations with global reach have come to define the security landscape for even the most powerful nations Across the first decades of the twenty first century we have witnessed a dramatic rise in the use of military force by these nonstate actors in ways that have impacted the international system leading Thomas to undertake this valuable assessment of the state of play at this critical moment To understand the spread of nonstate violence Thomas focuses on the crucial role played by an epochal transformation in international norms Since the eighteenth century the Westphalian model of sovereignty has reserved the legitimate use of force to states Thomas argues that normative changes in the decades after World War II produced a crisis of coherence for formal and informal rules against nonstate violence In detailed case studies of nonstate militias transnational terrorist networks and private military contractors Thomas explains how forces contesting state prerogatives exploited this crisis which in turn reshaped international understandings of who could legitimately use force By considering for the first time all three purveyors of nonstate violence as aspects of the same phenomenon *The New Dogs of War* explains this fundamental shift in the norm that for centuries gave states the monopoly on military force

**Ending War** Chiara De Franco, Anders Engberg-Pedersen, Martin Mennecke, 2021-11-29 *Ending War* A Dialogue across Disciplines examines how wars end from a multidisciplinary perspective and includes enquiries into the politics of war the laws of war and the military and intellectual history of war In recent years the changes in the character of contemporary warfare have created uncertainties across different disciplines about how to identify and conceptualise the end of war A whole constellation of

questions arises from such uncertainties How do philosophers define ethical responsibilities in bello and post bellum if the boundary between war and peace is ever so blurred How do strategists define their objectives if the teleology of action becomes uncertain How do historians bracket the known endings of war and delve into the arguments that preceded them Which answers can international law provide for the ending of wars and which challenges remain or have recently arisen This volume addresses these questions and enables both an understanding of how the end as a concept informs the understanding of war in international relations in international law and in history as well as a reconsideration of the nature of scientific method in the field of war studies as such The chapters in this book were originally published as a special issue of

The Journal of Strategic Studies      **The Business of War** James McCarty,Matthew Tapie,Justin Bronson

Barringer,2020-10-01 The Business of War incisively interrogates the development and contemporary implications of the military industrial complex It exposes the moral dangers of life in neoliberal economies dependent upon war making for their growth and brings the Christian tradition s abundance of resources into conversation with this phenomenon In doing so the authors invite us to rethink the moral possibilities of Christian life in the present day with an eye toward faithful resistance to the business of war and its influence in every aspect of our lives In combining biblical historical theological and ethical analyses of the business of war the authors invite us to better understand it as a new moral problem that demands a new faithful response With contributions from Pamela Brubaker Stan Goff Christina McRorie Kara Slade Won Chul Shin David Swartz Jonathan Tran Myles Werntz Matthew Whelan Tobias Winright      **Moral Responsibility in Twenty-First-Century**

**Warfare** Steven C. Roach,Amy E. Eckert,2020-09-01 2021 CHOICE Outstanding Academic Title Moral Responsibility in Twenty First Century Warfare explores the complex relationship between just war theory and the ethics of autonomous weapons systems AWS One of the challenges facing ethicists of war particularly just war theorists is that AWS is an applicative concept that seems in many ways to lie beyond the human ist scope of the just war theory tradition The book examines the various ethical gaps between just war theory and the legal and moral status of AWS addresses the limits of both traditional and revisionist just war theory and proposes ways of bridging some of these gaps It adopts a dualistic notion of moral responsibility or differing related notions of moral responsibility and legitimate authority to study the conflicts and contradictions of legitimizing the autonomous weapons that are designed to secure peace and neutralize the effects of violence Focusing on the changing conditions and dynamics of accountability responsibility autonomy and rights in twenty first century warfare the volume sheds light on the effects of violence and the future ethics of modern warfare      **The War**

**In-Between** Wendy Kozol,2024-05-07 Explores the ambiguities and contradictions that disrupt the assumed boundaries of battle zones Against the fabric of suffering that unfolds around more spectacular injuries and deaths The War In Between studies visual depictions of banal routine or inscrutable aspects of militarized violence Spaces of the in between are both broader and much less visible than battlefields even though struggles for survival arise out of the same conditions of

structural violence Visual artifacts including photographs video data visualizations fabric art and craft projects provide different vantage points on the quotidian impacts of militarism whether it is the banality of everyday violence for non combatants or the daily struggles of soldiers living with physical and emotional trauma Three interrelated concepts frame the book s attempt to stay in the moment of looking at visual cultures of survival First the concept of the war in between captures those interstitial spaces of war where violence and survival persist side by side Second this book expands the concept of indexicality to consider how images of the in between rely on a range of indexical traces to produce alternative visualities about survival and endurance Third the book introduces an asymptotic analysis to explore the value in getting close to the diverse experiences that comprise the war in between even if the horizon line of experience is always just out of reach Exploring the capaciousness of survival reveals that there is more to feel and engage in war images than just mangled bodies collapsing buildings and industrialized death The War In Between Kozol argues offers not a better truth about war but an accounting of visualities that arise at the otherwise unthinkable junction of conflict and survival

James Martin, Leora Rosen, Linette R. Sparacino, 2000-07-30 Today there are more military family members than there are total uniformed service members. Sixty percent of the military are married, including more than eighty percent of all career status personnel, and many have small children. They come from diverse racial and ethnic backgrounds and they represent a wide variety of family types, including single parents, dual career military couples, and families with eldercare responsibilities. In an effort to cut costs, many of the services utilized by military families are being privatized or outsourced to civilian service providers. This guide is designed to benefit anyone who provides services to these families, particularly those who may have little or no prior knowledge of the unique nature of military families and military family life. This book contains research-based information about the unique needs of military families across various duty-related conditions as well as within the context of military career demands. Its multi-service focus addresses the provision of human services in both peace and wartime. Topics include military spouse employment, retirement issues, family support during deployments, the New Parent Support Program, and the experiences of adult children of military parents. The authors encourage an understanding of military community-based programs and services and they offer the reader numerous resources for collaboration with the military community.
