the success of the Internet of Things IoTs The authors provide a multidisciplinary view of sensor technology from MEMS biological chemical and electrical domains and showcase smart sensor systems in real applications including smart home transportation medical environmental agricultural etc Unlike earlier books on sensors this book provides a global view on smart sensors covering abstraction levels from device circuit systems and algorithms *RESTful Web Services* Leonard Richardson,Sam Ruby,2008-12-17 Every developer working with the Web needs to read this book David Heinemeier Hansson creator of the Rails framework RESTful Web Services finally provides a practical roadmap for constructing services that embrace the Web instead of trying to route around it Adam Trachtenberg PHP author and EBay Web Services Evangelist You ve built web sites that can be used by humans But can you also build web sites that are usable by machines That s where the future lies and that s what RESTful Web Services shows you how to do The World Wide Web is the most popular distributed application in history and Web services and mashups have turned it into a powerful distributed computing platform But today s web service technologies have lost sight of the simplicity that made the Web successful They don t work like the Web and they re missing out on its advantages This book puts the Web back into web services It shows how you can connect to the programmable web with the technologies you already use every day The key is REST the architectural style that drives the Web This book Emphasizes the power of basic Web technologies the HTTP application protocol the URI naming standard and the XML markup language Introduces the Resource Oriented Architecture ROA a common sense set of rules for designing RESTful web services Shows how a RESTful design is simpler more versatile and more scalable than a design based on Remote Procedure Calls RPC Includes real world examples of RESTful web services like Amazon s Simple Storage Service and the Atom Publishing Protocol Discusses web service clients for popular programming languages Shows how to implement RESTful services in three popular frameworks Ruby on Rails Restlet for Java and Django for Python Focuses on practical issues how to design and implement RESTful web services and clients This is the first book that applies the REST design philosophy to real web services It sets down the best practices you need to make your design a success and the techniques you need to turn your design into working code You can harness the power of the Web for programmable applications you just have to work with the Web instead of against it This book shows you how Applied Technologies Miguel Botto-Tobar,Marcelo Zambrano Vizuete,Pablo Torres-Carrión,Sergio Montes León,Guillermo Pizarro Vásquez,Benjamin Durakovic,2020-03-02 This first volume of the three volume set CCIS 1193 CCIS 1194 and CCIS 1195 constitutes the refereed proceedings of the First International Conference on Applied Technologies ICAT 2019 held in Quito Ecuador in December 2019 The 124 full papers were carefully reviewed and selected from 328 submissions The papers are organized according to the following topics technology trends computing intelligent systems machine vision security communication electronics e learning e government e participation *Internet of Things* Simone Cirani,Gianluigi Ferrari,Marco Picone,Luca Veltri,2018-11-12 This book addresses researchers and graduate students at the forefront of

study research on the Internet of Things IoT by presenting state of the art research together with the current and future challenges in building new smart applications e g Smart Cities Smart Buildings and Industrial IoT in an efficient scalable and sustainable way It covers the main pillars of the IoT world Connectivity Interoperability Discoverability and Security Privacy providing a comprehensive look at the current technologies procedures and architectures **Rule Based Integration of Web Services Into Semantic Data Bases** Jochen Gruber,2007-08 Master s Thesis from the year 2006 in the subject Computer Science Internet New Technologies grade 1 1 University of Hagen Institut f r Informatik language English abstract Details of a semantic annotation are outlined both for the semantic model consisting of concepts to model the area of discourse as well as the individual model for a single service The annotation is used to build a concrete implementation of a generic processing framework translating the annotation of a service into rules to be integrated into an OWL knowledge base rule engine The realization is done for the Jena Semantic Web Framework an open source library for Semantic Web application for the Java language The realization is designed as an add on to Jena which integrates service calls in such a way that service invocation is transparent to applications building on Jena A discussion on optimizations both implemented ones and realizable but not implemented ones is included They can serve as starting points for moving the implementation from a proof of concept status to real world usability The section finishes with some considerations on general run time behavior Finally the presented framework is evaluated in more detail Firstly a sophisticated scenario for the running example is described and shown how automated service selection composition and invocation is actually realized during run time Then the approach is evaluated with regard to services with more complex parameterizations with particular focus on the data supplied to the services and the rules generated from such complex parameterized services and whether such rules are still usable The prime design rationale of the presented framework implementation is as a proof of concept for the approach of generically integrating Web Services as rules with Semantic knowledge bases Therefore there is still a long way to go for a real world application to be build on the framework At several points notes are added Library Mashups Nicole C. Engard,2009 This unique book is geared to help any library keep its website dynamically and collaboratively up to date increase user participation and provide exemplary web based service through the power of mashups Back cover
Identifying and Assessing Opportunities for the Introduction of Web Services through Business Process Modelling Jan-Hendrik Sewing,2004-02-17 Diploma Thesis from the year 2003 in the subject Computer Science Commercial Information Technology grade 1 0 A University Karlsruhe TH AIFB Research Centre Computer Science FZI language English abstract Thus many organisations are still struggling to assess the real impact of WS and the accompanying opportunities and threats Without an appropriate business alignment WS might be perceived as a purely technical solution not delivering significant business benefits This constitutes a potential risk factor in the light of recent views on IT benefits and current IT spending practice and could eventually hamper a wide adoption The complete thesis tries to mitigate this issue It gives a concise

description of the underlying ideas and constituting elements of WS and also describes their relationship to other IT concepts The expected impact and benefits of WS applications are outlined and the stumbling blocks and risks associated with WS are described Comprehensive classification schemes are proposed for both the benefits and issues Predicted future WS adoption stages and their characteristics are outlined The actual state of WS adoption is also determined and described by presenting recent survey results and the outcome of an own WS review WS implementations are described and categorised according to identified major business drivers for WS application Based on this comprehensive characterisation of WS the focus of the thesis is then put on developing a methodology for the assessment of WS through Business Process Modelling BPM A structured framework is proposed for selecting the most appropriate processes for WS applications Following this information domains and types are identified that need to be contained in a Business Process Model to support systematic WS assessments and facilitate WS deployment This critical information is then mapped to its representation in a Business Process Model with appropriate BPM techniques offered by the ARIS Toolset a widely used toolset for BPM The conceptual possibilities are finally illustrated through an example in eprocurement The proposed methodology facilitates a business oriented view on WS Containing several checklists and adaptable scoring tables it allows executives and analysts to systematically identify WS opportunities and IT vendors to position their solutions The thesis concludes with a discussion of the discovered limited functionality of the modelling toolset and provides an outlook for further research in the area of using BPM to support Web Service applications for improving business processes **Service-oriented Architecture** Thomas Erl,2004 Reap the benefits of increased ROI by integrating Service Oriented Design principles and XML Web services into your IT infrastructure *Executive's Guide to Web Services (SOA, Service-Oriented Architecture)* Eric A.
