**Discrete Element Method for Multiphase Flows with Biogenic Particles** Ling Zhou, Mahmoud A. Elemam, Ramesh K. Agarwal, Weidong Shi, 2024-09-24 This book presents the advanced theory and application of the combined Computational Fluid Dynamics/Discrete Element Method (CFD/DEM) to

multiphase flow simulations of the gas and bio particulate matter of non uniformly shaped biomass It explores how DEM can simulate the complex behaviour of biomass particles such as their packing in the multiphase flows that occurs in the agricultural product processing industries It offers an overview of aerodynamic systems such as cyclone separators used in the agricultural processing industry A detailed description of DEM modeling including the particle particle particle boundary and particle fluid interactions in the context of biomass particles of varying sizes and shapes is provided Coverage includes the critical application of CFD DEM simulation technology in designing and optimizing grain handling and processing equipment and the application of extended DEM to other granular flows of complex particles like sand powders and dust from mines where clumping and agglomeration occur The application of DEM in modeling and simulation of complex multiphase systems can help improve productivity reduce costs and increase efficiency in the agricultural industry

*Automotive Painting Technology* Kimio Toda,Abraham Salazar,Kozo Saito,2012-12-21 This book offers unique and valuable contributions to the field It offers breadth and inclusiveness Most existing works on automotive painting cover only a single aspect of this complex topic such as the chemistry of paint or paint booth technology Monozukuri and Hitozukuri are Japanese terms that can be translated as making things and developing people but their implications in Japanese are richer and more complex than this minimal translation would indicate The Monozukuri Hitozukuri perspective is drawn from essential principles on which the Toyota approach to problem solving and continuous improvement is based From this perspective neither painting technology R D nor painting technology use in manufacturing can be done successfully without integrating technological and human concerns involved with making and learning in the broadest sense as the hyphen is meant to indicate The editors provide case studies and examples drawn from Mr Toda's 33 years of experience with automotive painting at Toyota and from Dr Saito's 18 years experience with IR4TD the research for development group he leads at the University of Kentucky that give details on how these two principles can be integrated for successful problem solving and innovation in industry in university R D and in the collaboration between the two The book will bring readers up to date on progress in the field over the last decade to provide a basis for and to indicate fruitful directions in future R D and technology innovation for automotive painting
