Muse Jennifer Blessing,2015 This volume is the first to gather together Mickalene Thomas's various approaches to photography including portraits, collages, Polaroids and other processes. The book also includes a section entitled Self-Representation in an Expanded Field by Ace Lehner, 2021-05-31. Defined as a self image made with a hand held mobile device and shared via social media platforms, the selfie has facilitated self imaging, becoming a ubiquitous part of globally networked contemporary life. Beyond this, selfies have facilitated a diversity of image making practices and enabled otherwise representationally marginalized constituencies to insert self representations into visual culture. In the Western European and North American art historical context, self portraiture has been somewhat rigidly, albeit obliquely, defined and selfies have facilitated a shift regarding who literally holds the power to self image. Like self portraits, not all selfies are inherently aesthetically or conceptually rigorous or avant guard. But as this project aims to do, address via a variety of interdisciplinary approaches, selfies have irreversibly impacted visual culture, contemporary art and portraiture in particular. Selfies propose new modes of self imaging, forward emerging aesthetics and challenge established methods. They prove that, as scholars and image makers, it is necessary to adapt and innovate in order to contend with the most current form of self representation to date. The essays gathered herein will reveal that, in our current moment, it is necessary and advantageous to consider the merits and interventions of selfies and self portraiture in an expanded field of self representations. We invite authors to take interdisciplinary global perspectives to investigate various sub genres, aesthetic practices and lineages in which selfies intervene to enrich the discourse on self representation in the expanded field today.

In the Black Fantastic Ekow Eshun, 2022-09-13. A richly illustrated exploration of Black culture at its most wildly imaginative, artistically ambitious and politically urgent. A richly illustrated exploration of Black culture at its most wildly imaginative and artistically ambitious. In the Black Fantastic assembles art and imagery from across the African diaspora. Embracing the mythic and the speculative, it recycles and reconfigures elements of fable, folklore, science fiction, spiritual traditions, ceremonial pageantry and the legacies of Afrofuturism. In works that span photography, painting, sculpture, cinema, graphic arts, music and architecture, In the Black Fantastic shows how speculative fictions in Black art and culture are boldly reimagining perspectives on race, gender and identity. Standing apart from Western narratives of progress and modernity premised on the historical subjugation of people of color, In the Black Fantastic celebrates the ways that Black artists draw inspiration from African originated myths, beliefs and knowledge systems, confounding the Western dichotomy between the real and unreal, the scientific and the supernatural. Featuring more than 300 color illustrations, this beautifully designed book brings together works by leading artists such as Kara Walker, Chris Ofili and Ellen Gallagher, explores groundbreaking films like *Daughters of the Dust* and *Get Out*, considers
