## **Book And Network Theorizing Knowledge Work Telecommunications:**

**Network** Clay Spinuzzi,2008 How does a telecommunications company function when its right hand often doesn't know what its left hand is doing How do rapidly expanding interdisciplinary organizations hold together and perform their knowledge work In this book Clay Spinuzzi draws on two warring theories of work activity theory and actor network theory to examine the networks of activity that make a telecommunications company work and thrive In doing so Spinuzzi calls a truce between the two theories bringing them to the negotiating table to parley about work Specifically about net work the work that connects coordinates and stabilizes polycontextual work activities To develop this uneasy dialogue Spinuzzi examines the texts trades and technologies at play at Telecorp both historically and empirically Drawing on both theories Spinuzzi provides new insights into how network actually works and how our theories and research methods can be extended to better understand it Publisher description

**All Edge** Clay Spinuzzi,2015-03-17 Work is changing Speed and flexibility are more in demand than ever before thanks to an accelerating knowledge economy and sophisticated communication networks These changes have forced a mass rethinking of the way we coordinate collaborate and communicate Instead of projects coming to established teams teams are increasingly converging around projects Spinuzzi offers for the first time a comprehensive framework for understanding how these new groups function and thrive His rigorous analysis tackles both the pros and cons of this evolving workflow and is based in case studies of real all edge adhocracies at work His provocative results will challenge our long held assumptions about how we should be doing work

**Professional Communication and Network Interaction** Heidi A. McKee,James E. Porter,2017-06-14 Drawing from classical and contemporary rhetorical theory and from in depth interviews with business professionals the authors present a case based approach for exploring the changing landscape of professional communication

**Mass Authorship and the Rise of Self-Publishing** Timothy Laquintano,2016-10-15 In the last two decades digital technologies have made it possible for anyone with a computer and an Internet connection to rapidly and inexpensively self publish a book Once a stigmatized niche activity self publishing has grown explosively Hobbyists and professionals alike have produced millions of books circulating them through e readers and the web What does this new flood of books mean for publishing authors and readers Some lament the rise of self publishing because it tramples the gates and gatekeepers who once reserved publication for those who met professional standards Others tout authors new freedom from the narrow minded exclusivity of traditional publishing Critics mourn the death of the author fans celebrate the democratization of authorship Drawing on eight years of research and interviews with more than eighty self published writers Mass Authorship avoids the polemics instead showing how writers are actually thinking about and dealing with this brave new world Timothy Laquintano compares the experiences of self publishing authors in three distinct genres poker strategy guides memoirs and romance novels as well as those of writers whose self published works hit major bestseller lists He finds that the significance of self publishing and the

challenge it presents to traditional publishing depend on the aims of authors the desires of their readers the affordances of their platforms and the business plans of the companies that provide those platforms In drawing a nuanced portrait of self publishing authors today Laquintano answers some of the most pressing questions about what it means to publish in the twenty first century How do writers establish credibility in an environment with no editors to judge quality How do authors police their copyrights online without recourse to the law How do they experience Amazon as a publishing platform And how do they find an audience when it sometimes seems there are more writers than readers

**Cross-Border Networks in Writing Studies** Derek Mueller,Andrea Williams,2017-02-18 Cross Border Networks in Writing Studies coordinates mixed methods approaches to survey interview and case study data to study Canadian writing studies scholars The authors argue for networked disciplinarity the notion that ideas arise and flow through intellectual networks that connect scholars not only to one another but to widening networks of human and nonhuman actors Although the Canadian field is historically rooted in the themes of location and national culture expressing a tension between Canadian independence and dependence on the US field more recent research suggests a more hybridized North American scholarship rather than one defined in opposition to rhetoric and composition in the US In tracing identities roles and rituals of nationally bound considerations of how

disciplinarity has been constructed through distant and close methods this multi scaled multi scopic approach examines the texture of interdependent constructions of the Canadian discipline Cross Border Networks in Writing Studies also launches a collaborative publishing network between Canadian publisher Inkshed and US publisher Parlor Press

**Genre Networks and Empire** Xiaoye You,2023-03-31 This book argues that political persuasion expanded in early imperial China through diverse written genres and that what ancient Chinese called wenti jingwei or genre networks provides the central means to understand rhetoric and government at the time

**Rhetorics Change / Rhetoric's Change** Jenny Rice,Chelsea Graham,Eric Detweiler,2018-05-01 Rhetorics Change Rhetoric's Change features selected essays multimedia texts and audio pieces from the 2016 Rhetoric Society of America biennial conference which spotlighted the theme Rhetoric and Change The pieces are broadly focused around eight different lines of thought Aural Rhetorics Rhetoric and Science Embodiment Digital Rhetorics Languages and Publics Apologia Revolution Reflection and Intersectionality Interdisciplinarity and the Future of Feminist Rhetoric Simultaneously familiar yet new the value of this collection can be found in the range of its modes and voices

**Legal Issues in Global Contexts** Kirk St. Amant,Martine Rife,2016-12-05 Today it has been said the world is flat as online media allow information to move easily from point to point across the earth International legal differences however are increasingly affecting the ease with which data and ideas can be shared across nations Copyright law for example affects the international flow of materials by stipulating who has the right to replicate or to share certain kinds of content Similarly perspectives on privacy rights can differ from nation to nation and affect how personal information is shared globally Moreover national laws can affect the exchange of ideas by stipulating the language in which information must be presented

in different geopolitical regions Today s technical communicators need to understand how legal factors can affect communication practices if they wish to work effectively in global contexts This collection provides an overview of different legal aspects that technical communicators might encounter when creating materials or sharing information in international environments Through addressing topics ranging from privacy rights and information exchange to the legalities of business practices in virtual worlds and perspectives on authorship and ownership the contributors to this volume examine a variety of communication based legal issues that can cause problems or miscommunication in international interactions Reviewing such topics from different perspectives the authors collectively provide ideas that could serve as a foundation for creating best practices on or for engaging in future research in the area of legal issues in international settings
