Citizen Support for Democratic and Autocratic Regimes Marlene Mauk,2020-04-30 Citizen Support for Democratic and Autocratic Regimes takes a political culture perspective on the struggle between democracy and autocracy by examining how these regimes fare in the eyes of their citizens Taking a globally comparative approach it studies both the levels as well as the individual and system level sources of political support in democracies and autocracies worldwide The book develops an explanatory model of regime support which includes both individual and system level determinants and specifies not only the general causal mechanisms and pathways through which these determinants affect regime support but also spells out how these effects might vary between the two types of regimes It empirically tests its propositions using multi level structural equation modeling and a comprehensive dataset that combines recent public opinion data from six cross national survey projects with aggregate data from various sources for more than 100 democracies and autocracies It finds that both the levels and individual level sources of regime support are the same in democracies and autocracies but that the way in which system level context factors affect regime support differs between the two types of regimes The results enhance our understanding of what determines citizen support for fundamentally different regimes help assessing the present and future stability of democracies and autocracies and provide clear policy implications to those interested in strengthening support for democracy and or fostering democratic change in autocracies Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political

Parliaments in Time Michael Koß, 2018-11-15 Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterized by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Emilie van Haute Professor of Political Science Universit libre de Bruxelles Ferdinand M ller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow John and Rebecca Moores Professor of Political Science University of Houston How can we explain the evolution of legislatures in Western Europe This book analyses ninety procedural reforms which restructured control over the plenary agenda and committee power in Britain France Sweden and Germany between 1866 and 2015 Legislatures evolve towards one of two procedural ideal types talking where governments control the agenda or working legislatures with powerful committees All else being equal legislators demand for mega seats on legislative committees triggers the evolution of working legislatures If however legislators fail to centralize agenda control in response to anti system obstruction legislative procedures break down Rather than a decline of legislatures talking legislatures accordingly indicate the resilience of legislative democracy In conclusion the book shows the causal nexus between procedural reforms and legislative democracy

Ideological Flexibility of Political Parties in the Era of Transnational Cleavage Alessio Scopelliti, 2025-02-04 This book provides a comprehensive analysis of how the parties of Lega and Rassemblement National have adjusted their ideologies over a four decade period to adapt to the new transnational cleavage in Western Europe the conflict between pro EU and anti EU sentiments It sheds light on their ability to change ideological positions policy stances and adopt strategic shifts in response to the evolving political landscape Drawing from a rich array of sources the book challenges the perception of established radical right parties as inflexible revealing their significant ideological adaptability As such it offers a richer understanding of the dynamics within the radical right party family This book is of key interest to scholars and students of Euroscepticism the Radical Right party politics and more broadly to European and comparative politics

Leaders without Partisans Diego Garzia, Frederico Ferreira da Silva, Andrea de Angelis, 2021-09-01 Leaders without Partisans examines the changing impact of party leader evaluations on voters behavior in parliamentary elections The decline of traditional social cleavages the pervasive mediatization of the political scene and the media's growing tendency to portray politics in personalistic terms all led to the hypothesis that leaders matter more for the way individuals vote and often the way elections turn out This study offers the most comprehensive longitudinal assessment of this hypothesis so far The authors develop a composite theoretical framework based on currently disconnected strands of research from party media and electoral studies and test it empirically on the

most encompassing set of national election study datasets ever assembled. The labor intensive harmonization effort produces an unprecedented dataset pooling information for a total of 129 parliamentary elections conducted between 1961 and 2018 in 14 West European countries. The book provides evidence of the longitudinal growth in leader effects on vote choice and on turnout. The process of partisan dealignment and changes in the structure of mass communication in Western societies are identified as the main drivers of personalization in voting behavior.

Leadership and Politics Bryan D. Jones, 1989. In twelve essays influential scholars in political science explore the meaning of political leadership from the kaleidoscopic perspectives of the leaders institutions goals procedures problems and traditions involved. The approaches as varied as the subject itself coalesce around the central question of how leaders interact with transform or are controlled by the organizations they lead.
