Lake Effects Ronald R. Weiner, 2005 *Lake Effects* is a history of urban policy making in the large Midwestern industrial city of Cleveland Ohio Urban policy making requires goal setting in four critical areas economic development urban growth services and wealth redistribution Ronald Weiner shows how urban policy was conceived and implemented by the local governing elites or regimes between 1825 and 1929 Each regime Merchant Populist Corporate and Realty set policy goals in the four areas set priorities among the goals and used their power public and private to guide the city toward these ends Each regime dominated policy making for at least twenty years and the successes and failures of each regime contribute to our understanding of how Cleveland became the city that it is today The successes of the Merchant Regime s economic development policy made Cleveland s industrialization possible The urban growth policy of the Corporate Regime built the downtown civic center and University Circle However the Populist Corporate and Realty regimes failures to plan for Cleveland s economic future helped set in motion the declining economic fortunes so harshly in evidence today and the triumph of the expansionist Realty Regime s urban growth policy promoted heedless suburban development at the expense of the central business district and inner city Book jacket

Housing America Randall G. Holcombe,2017-07-05 Housing policy not only affects all Americans quality of life but has a direct impact on their financial well being About 70 percent of American households own their own homes and for most their homes represent the majority of their net worth Renters are affected by housing policy Even the small minority of Americans who are homeless are affected by housing policies specifically targeted to low income individuals The government's increasing involvement in housing markets fed by popular demand that government do something to address real problems of mortgage defaults and loans provides good reason to take a new look at the public sector in housing markets Crises in prime mortgage lending may lower the cost of housing but the poor and homeless cannot benefit because of increases in unemployment Even the private market is heavily regulated Government policies dictate whether people can build new housing on their land what type of housing they can build the terms allowed in rental contracts and much more This volume considers the effects of government housing policies and what can be done to make them work better It shows that many problems are the result of government rules and regulations Even in a time of foreclosures the market can still do a crucial job of allocating resources just as it does in other markets Consequently the appropriate policy response may well be to significantly reduce not increase government presence in housing markets Housing America is a courageous and comprehensive effort to examine housing policies in the United States and to show how such policies affect the housing market
