*Opening Government* John Wanna, Sam Vincent, 2018-04-23 Transparency and citizen engagement remain essential to good government and sound public policy. Indeed, they may well be the key to restoring trust in government itself, currently at an all-time low in Australia. It is ironic then that this has occurred at a time when the technological potential for information dissemination and interaction has never been greater. *Opening Government: Transparency and Engagement in the Information Age* explores new horizons and scenarios for better governance in the context of the new information age, focusing on the potentials and pitfalls for governments and governance more broadly operating in the new information-rich environment. Its contributors, a range of international and Australian governance academics and practitioners, ask what are the challenges to our governing traditions and practices in the new information age and where can better outcomes be expected using future technologies. They explore the fundamental ambiguities extant in opening up government with governments intending to become far more transparent in providing information and in information sharing but also more motivated to engage with other data sources, data systems, and social technologies. **Appified** Jeremy Wade Morris, Sarah Murray, 2018-10-23 Snapchat, WhatsApp, Ashley Madison, Fitbit, Tinder, Periscope. How do we make sense of how apps like these and thousands of others have embedded themselves into our daily routines, permeating the background of ordinary life and standing at the ready to be used on our smartphones and tablets? When we look at any single app, it's hard to imagine how such a small piece of software could be particularly notable. But if we look at a collection of them, we see a bigger picture that reveals how the quotidian activities apps encompass are far from banal: connecting with friends and strangers and enemies, sharing memories and personally identifying information, making art and trash, navigating spaces and reshaping places in the process. While the sheer number of apps is overwhelming, as are the range of activities they address, each one offers an opportunity for us to seek out meaning in the mundane. *Appified* is the first scholarly volume to examine individual apps within the wider historical and cultural context of media and cultural studies scholarship attuned to issues of politics and power, identity and the everyday. **Exploring Screen Culture via Apple's Mobile Devices** Charles Soukup, 2016-12-13 *Exploring Screen Culture via Apple's Mobile Devices: Life through the Looking Glass* explores the role of mobile technologies in everyday life via the extended case study of Apple's mobile operating system iOS for the iPhone, iPad, and iPod. Via a detailed application including numerous extended examples of the experiences associated with Apple's iOS devices, Charles Soukup examines contemporary screen culture and how individuals navigate it via mobile technologies. Mobile devices provide a lifeline that sifts through limits and simplifies the complexities of rapid, vast circulating information in postmodern culture. Particularly simple, game-like applications with clear rules and numerical outcomes exceptionally focus, frame, and filter an overwhelming media-saturated culture. Rather than merely outlining the problems associated with a world dominated by digital screens, *Exploring Screen Culture via Apple's Mobile Devices* offers a means for understanding screen
