Apple Watch Vs Rolex:

One Giant One Stone Michael A. Woods, 2022-10-16 Michael A Woods has been digging into core precepts that define leadership for the past thirty years. As a young man in the Navy he was perplexed by the random distribution of leadership talent. Sailors lined up to follow some leaders while others with the same rank could not motivate a crew of subordinates to sweep a deck. While teaching lessons on Biblically based leadership the author discovered the story of David and Goliath recognized many leadership core concepts demonstrated in David's actions and began writing this book to answer questions such as How do leaders gain the authority to create change? What team motivational strategies are most effective? How does a leader make more workable decisions faster than the average person? How can risk be managed? Disciplined application of the precepts found in this book builds a framework to support success. Learn how to become a better leader in your personal and professional life with the lessons in *One Giant One Stone*

Designing Luxury Brands Diana Derval, 2024-06-27 This book, a second offering after the successful first edition, shows how to build successful luxury brands using the power of sensory science and neuropsychology. The author presents inspiring business cases like Tesla Cybertruck, Chanel KaDeWe, Baccarat, JACQUEMUS, NASA MUD Jeans, Lilium R my Cointreau, FENG J Moncler, Louboutin, or Raffles Dubai in industries such as Fashion, Automotive, or Leisure. The book highlights groundbreaking scientific methods like the Derval Color Test taken by over 30 million people to help predict luxury shoppers' preferences and purchasing patterns. Game changing and unique features of successful luxury brands are decoded. Through various practical examples and experiments, readers will be able to build, revamp, or expand luxury brands and look at luxury from a new angle.

The Right Sensory Mix Diana Derval, 2022-04-08 Many companies fail to acknowledge and analyze disparities observed among customers and simply put them down to culture or emotion. New neuroendocrinological research proves that people are rational. They just have a different biological perception of the same stimulus. Their preferences, behavior, and decisions are strongly influenced by the hundreds of millions of sensors monitoring their body and brain. People with more taste buds are, for example, sensitive to bitterness and are more likely to drink their coffee with sugar or milk or to drink tea. This book helps product managers, marketers, and corporate decision makers understand and predict customers' behavior and preferences. It provides the tools to design the right sensory mix: color, shape, depth, taste, smell, texture, and sound for each product and fine tune their positioning and range for every local market. Using cases from different sectors, the author shows that this approach delivers planet and people friendly innovations which have a higher chance of success in the market.
