Complex Adaptive System of Systems (CASoS) Engineering Applications. Version 1.0, 2011 Complex Adaptive Systems of Systems or CASoS are vastly complex eco socio economic technical systems which we must understand to design a secure future for the nation and the world Perturbations disruptions in CASoS have the potential for far reaching effects due to highly saturated interdependencies and allied vulnerabilities to cascades in associated systems The Phoenix initiative approaches this high impact problem space as engineers devising interventions problem solutions that influence CASoS to achieve specific aspirations CASoS embody the world s biggest problems and greatest opportunities applications to real world problems are the driving force of our effort We are developing engineering theory and practice together to create a

discipline that is grounded in reality extends our understanding of how CASoS behave and allows us to better control those behaviors Through application to real world problems Phoenix is evolving CASoS Engineering principles while growing a community of practice and the CASoS engineers to populate it Intelligent Complex Adaptive Systems Yang, Ang,Shan, Yin,2008-03-31 This book explores the foundation history and theory of intelligent adaptive systems providing a fundamental resource on topics such as the emergence of intelligent adaptive systems in social sciences biologically inspired artificial social systems sensory information processing as well as the conceptual and methodological issues and approaches to intelligent adaptive systems Provided by publisher **Complex Adaptive Systems** John H.
