The Mathematical Corporation Josh Sullivan, Angela Zutavern, 2017-06-06 The most powerful weapon in business today is the alliance between the mathematical smarts of machines and the imaginative human intellect of great leaders Together they make the mathematical corporation the business model of the future We are at a once in a decade breaking point similar to the quality revolution of the 1980s and the dawn of the internet age in the 1990s leaders must transform how they run

their organizations or competitors will bring them crashing to earth often overnight Mathematical corporations the organizations that will master the future will outcompete high flying rivals by merging the best of human ingenuity with machine intelligence While smart machines are weapon number one for organizations leaders are still the drivers of breakthroughs Only they can ask crucial questions to capitalize on business opportunities newly discovered in oceans of data This dynamic combination will make possible the fulfillment of missions that once seemed out of reach even impossible to attain Josh Sullivan and Angela Zutavern s extraordinary examples include the entrepreneur who upended preventive health care the oceanographer who transformed fisheries management and the pharmaceutical company that used algorithm driven optimization to boost vaccine yields Together they offer a profoundly optimistic vision for a dazzling new phase in business and a playbook for how smart companies can manage the essential combination of human and machine
