Conditions: Theory, Evidence, and Opportunities Andrew Kemp, Jeremy Tree, Fergus Gracey, Zoe Fisher, 2022-04-11

Addressing Ableism Jennifer Scuro, 2017-10-25 Addressing Ableism is a set of philosophical meditations outlining the scale and scope of ableism. By explicating concepts like experience diagnosis, precariousness, and prosthesis, Scuro maps out the institutionalized and intergenerational forms of this bias as it is analogous and yet also distinct from other kinds of dehumanization, discrimination, and oppression. This project also includes a dialogical chapter on intersectionality with Devonya Havis and Lydia Brown, a philosopher and writer/activist respectively. Utilizing theorists like Judith Butler, Tobin Siebers, Emmanuel Levinas, and Hannah Arendt to address ableism, Scuro thoroughly critiques the neoliberal culture and politics that underwrites ableist affections and phobias. This project exposes the many material and non-material harms of ableism and it offers multiple avenues to better confront and resist ableism in its many forms. Scuro provides crucial insights into the many uninhabitable and unsustainable effects of ableism and how we might revise our intentions and desires for the sake of a less ableist world.

Operating System Forensics Ric Messier, 2015-11-12 Operating System Forensics is the first book to cover all three critical operating systems for digital forensic investigations in one comprehensive reference. Users will learn how to conduct successful digital forensic examinations in Windows, Linux, and Mac OS. The methodologies used, key technical concepts, and the tools needed to perform examinations on mobile operating systems such as Android, iOS, Windows, and BlackBerry are also covered, providing everything practitioners need to conduct a forensic investigation of the most commonly used operating systems, including technical details of how each operating system works and how to find artifacts. This book walks you through the critical components of investigation and operating system functionality, including file systems, data recovery, memory forensics, system configuration, Internet access, cloud computing, tracking artifacts, executable layouts, malware, and log files. You'll find coverage of key technical topics like Windows Registry, etc. directory, Web browsers, caches, Mbox, PST files, GPS data, ELF, and more. Hands-on exercises in each chapter drive home the concepts covered in the book. You'll get everything you need for a successful forensics examination, including incident response tactics and legal requirements. Operating System Forensics is the only place you'll find all this covered in one book. Covers digital forensic investigations of the three major operating systems, including Windows, Linux, and Mac OS. Presents the technical details of each operating system, allowing users to find artifacts that might be missed using automated tools. Hands-on exercises drive home key concepts covered in the book. Includes discussions of cloud, Internet, and major mobile operating systems, such as Android and iOS.

Get to Aha!: Discover Your Positioning DNA and Dominate Your Competition Andy Cunningham, 2017-09-29 From the marketing strategist who helped Steve Jobs launch the original Apple Macintosh comes a groundbreaking guide to positioning any company for industry dominance. Andy Cunningham has been at the forefront of tech and innovation since day one and she's been helping companies create new product categories ever since. Now she reveals the winning framework she uses to transform markets and industries. Get to Aha shows how to establish the kind of

foundation world class brands are built on. Too many business leaders fail to ask the most basic questions about their company: Who are we? And why do we matter? Before they leap right into branding, a big mistake. A company must first know itself, establish its position before it can express its identity, execute its branding. There are three types of companies in the world, each with its own DNA: Mothers are customer oriented, Mechanics are product oriented, and Missionaries are concept oriented. And it's absolutely critical for business leaders to know which type their company is to create an authentic and ultimately sticky position in the market. A company's DNA is the key to achieving this and with it a competitive advantage. Why? Because if a Mechanic creates a marketing campaign based on its belief that it is a Missionary, the underlying positioning will not ring true and the company won't gain a foothold in the market. But if a company positions itself in alignment with its DNA, it will resonate authentically and establish its role and relevance even in the face of a major competitor. *Get to Aha* presents a clear step-by-step framework that will help you determine your company's precise position in the marketing landscape using Andy's DNA-based methodology. It takes you through the process of performing genetic testing on your company, examining the market through the six Cs of positioning and developing your positioning statement, a rational, factual statement about your company's role and relevance. Then, and only then, can you create a branding and marketing strategy that will build market momentum and crush the competition. Trust Andy Steve Jobs did.

Received: 7 Steps to Break Down Communication Barriers at Work Mary E. Donohue, 2020-09-29. The action plan you need to ensure everyone's understood digitally and across generations. According to social scientist and award-winning CEO Dr. Mary Donohue, we communicate ineffectively at work a staggering 80% of the time. From the tone of an email to the almost-but-not-quite eye contact of a video conference app, today's tech has increased the speed and scope of our communications as well as the opportunities to misunderstand each other completely. This lack of effective communication is a leading cause of workplace stress. In this widely anticipated and deeply researched book, Dr. Donohue, a victim of workplace stress herself, lays out a seven-step solution to give you the tools you need to make communication a cure for workplace stress, not a cause even, especially when you're working with a generationally diverse team. Discover what's at the root of the problem from misunderstood emails and misinterpreted texts to misconstrued social media posts and missed social cues on Zoom, and learn how to respond to different communication preferences now. Through helpful charts, case studies, evidence-backed research, and more, you'll walk away with the tools you need to ensure everyone on your team—yourself included—is heard and understood so there's less time clarifying and more time for everyone to be their best, most productive selves.
