## **Bureaucrats Politics And The Environment:**

**Bureaucrats, Politics And the Environment** Richard W. Waterman, Amelia A. Rouse, Robert Wright, 2004-03-21 The bureaucracy in the United States has a hand in almost all aspects of our lives from the water we drink to the parts in our cars For a force so influential and pervasive however this body of all nonelective government officials remains an enigmatic impersonal entity The literature of bureaucratic theory is rife with contradictions and mysteries **Bureaucrats Politics and the Environment** attempts to clarify some of these problems The authors surveyed the workers at two agencies enforcement personnel from the U S Environmental Protection Agency and employees of the New Mexico Environment Department By examining what they think about politics the environment their budgets and the other institutions and agencies with which they interact this work puts a face on the bureaucracy and provides an explanation for its actions

**Environmental Politics in Japan, Germany, and the United States** Miranda A. Schreurs, 2003-03-13 A decade of climate change negotiations almost ended in failure because of the different policy approaches of the industrialized states Japan Germany and the United States exemplify the deep divisions that exist among states in their approaches to environmental protection Germany is following what could be called the green social welfare state approach to environmental protection which is increasingly guided by what is known as the precautionary principle In contrast the US is increasingly leaning away from the use of environmental regulations towards the use of market based mechanisms to control pollution and cost benefit analysis to determine when environmental protection should take precedence over economic activities Internal political divisions mean that Japan sits uneasily between these two approaches Miranda A Schreurs uses a variety of case studies to explore why these different policy approaches emerged and what their implications are examining the differing ideas actors and institutions in each state

**Environment & Planning**, 2005 **Business and Environmental Politics in Canada** Douglas Macdonald, 2007-01-01 This is an important and probing analysis and is without doubt the definitive book on business and environmental politics and policy in Canada G Bruce Doern Carleton University **Social and economic impact of environmental policies** R. Swarup, S. N. Mishra, V. P. Jauhari, **Environment, Development and Politics in India** Renu Khator, 1991-08-05 For decades India has vigorously and openly pursued the goal of economic development In recent years however the propriety of this goal has been challenged by the global environmental crisis Nevertheless development is a necessity for India due to its escalating population and the overwhelming poverty its population faces This book examines the process of environmental decision making and implementation in India Contrary to the general perception that politics plays a passive or secondary role in the making of environmental policy this study demonstrates that the role of politics is both aggressive and goal oriented Contents Environmental Crisis Making of an Environmental Policy Functioning of an Environmental Bureaucracy Environmental Bureaucracy and Its Non Regulatory Functions Response From the People Environmental Politics In a Broader Perspective

**Environment**, 2003      *Environmental Policy and Politics* Michael E. Kraft, 2004 Concise and yet thorough *Environmental Policy and Politics* is an interdisciplinary engaging and up to date examination of environmental natural resource and energy policy and politics Drawing from work within environmental science policy analysis and political science this text critically assesses the key strengths and weaknesses of policymaking processes today as well as the promise of new policy approaches Arguing that strong public support is necessary for achieving environmental policy goals the Third Edition stresses the opportunities available to all citizens to influence environmental politics at every level of government      **The Politics of Structural Choice of the Commission for Environmental Cooperation** Linda J. Allen, 2005 For over a century states have been crafting international institutions to address a wide range of environmental problems but the effectiveness of these institutions has been limited Theories of international relations have historically guided research on these institutions but this scholarship has failed to provide adequate insights into why states have not been able to design effective institutions This study utilizes an alternative approach a theory of domestic politics in particular the positive theory of public bureaucracies to analyze the design of these institutions The main thesis of this study is that the design of international environmental institutions reflects efforts of political actors to overcome problems of expertise political uncertainty and political compromise while they seek to achieve their policy goals within a particular political arena rather than efforts by states to rationally pursue mutually beneficial joint gains or a desire of a powerful hegemon to cater to its own self interest To test this thesis this study examines the institutional choices associated with the creation of the North American Commission for Environmental Cooperation CEC This research consists of a single case study that draws on multiple sources of qualitative and quantitative data collected from documentation archival records interviews written surveys and direct observation and analyzed using counterfactuals and process tracing for qualitative data and descriptive statistics for quantitative data The findings of this research indicate that the positive theory of public bureaucracies has greater explanatory power for the institutional design of the CEC than rival theories hegemonic stability and functionalist theories Overall this research suggests that this theory of domestic politics offers a potentially useful theoretical approach for understanding the institutional design of international institutions      *Environmental Politics and Policy in the West, Revised Edition* Zachary A. Smith, John Freemuth, 2007-08-30 Zachary A Smith and John Freemuth bring together a roster of top scholars to explicate the unique policies and politics in the West as well as other key questions in this new edition of *Environmental Politics and Policy in the West* which was first published in 1993 This thoroughly revised and updated edition offers a comprehensive and current survey      **Environmental Politics and Policy in the West** Zachary Alden Smith, 1993      *Environmental Politics and Policy Making in Australia* Timothy Doyle, Aynsley John Kellow, 1995 *Environmental politics and policy making in Australia*      **Community Power, Bureaucracy, and Environmental Politics in New York City** Robert A. **Deep Environmental Politics** Phillip F. Cramer, 1998-04-23 Cramer provides a window into the world of radical environmentalism and the political process He examines how deep ecology evolved how its ideas influence our lives and how it impacts our laws The book begins with an overview of deep ecology and traces its history in American political thought Cramer then looks at the tactics employed by radical environmentalists and the relationship formed between activists and their political counterparts He explains the difference between what deep ecology ultimately wants and what it strives for on a daily basis Federal environmental legislation and congressional testimony are analyzed for trends and media coverage of radical environmentalism is also examined Cramer provides the first comprehensive look at the impact of deep ecology and radical environmentalism on American environmental politics and law This book will be invaluable to scholars and researchers of contemporary American politics and law environmental studies and the media

**Western Democracies** Joel D. Aberbach, Robert D. Putnam, Bert A. Rockman, 1981-10-21 In uneasy partnership at the helm of the modern state stand elected party politicians and professional bureaucrats This book is the first comprehensive comparison of these two powerful elites In seven countries the United States Great Britain France Germany Sweden Italy and the Netherlands researchers questioned 700 bureaucrats and 600 politicians in an effort to understand how their aims attitudes and ambitions differ within cultural settings One of the authors most significant findings is that the worlds of these two elites overlap much more in the United States than in Europe But throughout the West bureaucrats and politicians each wear special blinders and each have special virtues In a well ordered polity the authors conclude politicians articulate society s dreams and bureaucrats bring them gingerly to earth
