Rostron, 2014 *Coaching in Education* Christian van Nieuwerburgh, 2018-03-08 Coaching in Education Getting Better Results for Students Educators and Parents will support educational organisations in learning more about the current interest in coaching approaches within schools colleges and universities With chapters on coaching in primary schools and secondary schools with students staff and parents this book provides a sound basis for introducing coaching into any educational setting This book brings together the latest national and international academic research with real case studies and a focus on practice that makes a difference for learners Starting with a review of the existing literature and research into the area of coaching in education the book goes on to consider the role of coaching educational leaders coaching within the primary school setting and then secondary school settings The notion of mental toughness and its relationship to coaching is also explored The US and Australian perspectives on coaching in education are discussed in two chapters written by leading experts instructional coaching in the US and the integration of positive and coaching psychology in Australia *Coaching in Islamic Culture* Raja'a Allaho, Christian van Nieuwerburgh, 2018-03-08 This book is the result of a collaboration between two

authors who share a passion and commitment for coaching Its aim is to enthuse readers and provide guidance about the appropriate use of coaching within Islamic culture The intention is to provide a culturally relevant coaching framework for use in Islamic context which allows Muslims to develop in ways that are aligned with their faith and traditions The complete coaching framework presented here is called Ershad Internal Coaching Katharine St John-Brooks,2018-05-01 Internal Coaching The Inside Story provides a window into the world of internal coaching the challenges and rewards for the coaches themselves and the ways in which organisations can ensure that they can get best value for money from their investment in them Internal coaching is booming A recent survey showed that nearly four fifths of large organisations in the UK believe that internal coaching that is coaching delivered by one employee to another in a different chain of command will grow over the next three years Yet there has been surprisingly little written about the unique nature of the internal coaching role Drawing on the stories of hundreds of internal coaches coach sponsors lead coaches supervisors of internal coaches and coach trainers Internal Coaching The Inside Story gives internal coaches a voice It makes available to hard pressed HR directors talent managers and learning and development professionals the fruits of very practical research into what is working in organisations and how they might maximise the value for money they get from their investment in internal coaches *The Cross-Cultural Coaching Kaleidoscope* Jennifer Plaister-Ten,2018-04-27 Coaching has emerged from a Western largely Anglo American perspective that may not be appropriate across cultures given the multi cultural nature of societies and workplaces today and the working practice of virtual teams This has repercussions for the coaching profession There is little knowledge about the constituent factors of cross cultural coaching or the attitudes skills and knowledge required to practice in a global market Therefore there is little sharing of best practice that in turn has an impact upon coaching competency This book shows a unique approach to describing the impact of culture in the coaching relationship It demonstrates how culture can affect our perceptions thoughts and emotions influence our choices and impact our behaviour It identifies the need for the coach to become adept at raising awareness of cultural influences and to reframe psychological constructs often thought to have universal meaning such as responsibility **Swings and Roundabouts** Anna Golawski,Agnes Bamford,Professor Irvine Gersch,2018-05-01 The first two authors of this coaching workbook are themselves parents who have been on a journey of swings and roundabouts experienced the highs and lows of having children Having difficulties knowing how to parent in many situations which was not made easier by the conflicting advice in the media made them unsure of their own parenting skills This was one of the reasons that they entered into the field of parent coaching They were trained coaches who wanted to use their coaching skills and experience as parents to help both themselves and other parents get the understanding and trust in themselves to be the parents they dream of being As an educational and child psychologist Irvine was able to contribute an evidence and psychological base to the project Parents often feel alone and the authors have found that running courses for them created a space where they could share experiences with each other as

well as experiment with different ways of parenting It is their intention to give back some of the awareness they gained in this comprehensive and invaluable self coaching book
