George Farkas, 2017-09-05 This study

seeks to reorient our understanding of the early educational determinants of social stratification outcomes. It focuses on the process and consequences of unequal cognitive skill attainment for ethnic and poverty groups within our nation's cities. It draws theoretically on the notion that experiences at home and school create a feedback loop by which the cultural capital of the students' toolkit of skills, habits and styles with which they construct strategies of action evolves over time and largely determines differential success in mastering the teacher assigned homework. **Antitrust enforcement** United States.
