## **Burnham Freedom Manual:**

Transhumanism David Livingstone,2015-09-02 Transhumanism is a recent movement that extols man's right to shape his own evolution by maximizing the use of scientific technologies to enhance human physical and intellectual potential. While the name is new the idea has long been a popular theme of science fiction featured in such films as 2001 A Space Odyssey Blade Runner the Terminator series and more recently The Matrix Limitless Her and Transcendence. However as its adherents hint at in their own publications transhumanism is an occult project rooted in Rosicrucianism and Freemasonry and derived from the Kabbalah which asserts that humanity is evolving intellectually towards a point in time when man will become God. Modeled on the medieval legend of the Golem and Frankenstein they believe man will be able to create life itself in the form of living machines or artificial intelligence. Spearheaded by the Cybernetics Group the project resulted in both the development of the modern computer and MK Ultra the CIA's mind control program. MK Ultra promoted the mind expanding potential of psychedelic drugs to shape the counterculture of the 1960s based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the Tree of Knowledge. And as revealed in the movie Lucy through the use of smart drugs and what transhumanists call mind uploading man will be able to merge with the Internet which is envisioned as the end point of Kabbalistic evolution the formation of a collective consciousness or Global Brain. That awaited moment is what Ray Kurzweil a director of engineering at Google refers to as The Singularity. By accumulating the total of human knowledge and providing access to every aspect of human activity the Internet will supposedly achieve omniscience becoming the God of occultism or the Masonic All Seeing Eye of the reverse side of the American dollar bill.

Copyright Office,1979     The Rise of Digital Management François-Xavier de Vaujany,2024-06-03 This book analyzes the history of management placing it in perspective with both American history and the genealogy of digital technology. Focusing on the years of industrial mobilization in the United States from 1937 to 1945 and their extension into the Cold War it shows particularly how scientific management was reconfigured and re legitimized in favor of a new profoundly American geopolitics. In a context where the future was at a standstill this research also explains what became of the managerial processes at the heart of capitalism from the 40s onwards the shift from a managerial capitalism of calculation to a narrative capitalism made up of desiring machines. This digital management no longer simply contributes along with others to unveiling and revealing the future. Aligned with the American obsession with novelty it is the very process of revelation and unveiling with managers and consumers alike becoming the intersecting subjects of desires borne of managerial apocalypses. To explore this period of American history the author has combined a triple narrative anchored in three types of archives an intimate history of this reconfiguration from the presence in New York of Saint Exupéry Burnham and Wiener a description of the great historical moment of industrial mobilization and a philosophical speculation about
