Exemplars, Imitation, and Character Formation Eric Yang, 2024-08-22 This volume examines the role and relevance of exemplars and the practice of imitation in character development and formation While the role of exemplars and imitation in spiritual and moral formation has been an integral part of many religious and wisdom traditions in recent times there has been limited theological and philosophical investigation into it and a dearth of interdisciplinary discussion The book brings together relevant research and insights from leading experts within philosophy psychology and theology with a slight emphasis on Christian approaches to exemplars and imitation especially given the reflection on these themes throughout the history of the Christian intellectual and mystical tradition Many of the contributions display an interdisciplinary approach into these issues hence this volume will be of interest to philosophers psychologists theologians and others who work in moral psychology and character formation

Designing Effective Feedback Processes in Higher Education Naomi Winstone, David Carless, 2019-06-27 Feedback is one of the most powerful influences on student achievement yet it is difficult to implement productively within the constraints of a mass higher education system Designing Effective Feedback Processes in Higher Education A Learning Focused Approach addresses the challenges of developing effective feedback processes in higher education combining theory and practice to equip and empower educators It places less emphasis on what teachers do in terms of providing commentary and more emphasis on how students generate make sense of and use feedback for ongoing improvement Including discussions on promoting student engagement with feedback technology enabled feedback and effective peer feedback this book Contributes to the theory and practice of feedback in higher education by showcasing new paradigm feedback thinking focused on dialogue and student uptake Synthesises the evidence for effective feedback practice Provides contextualised examples of successful innovative feedback designs analysed in relation to relevant literature Highlights the importance of staff and student feedback literacy in developing productive feedback partnerships Supports higher education teachers in further developing their feedback practice Designing Effective Feedback Processes in Higher Education A Learning Focused Approach contributes to the theory and practice of higher education pedagogy by re evaluating how feedback processes are designed and managed It is a must read for educators researchers and academic developers in higher education who will benefit from a guide to feedback research and practice that addresses well recognised challenges in relation to assessment and feedback

International Partnerships for Strengthening Health Care Workforce Capacity: Models of Collaborative Education Jeanne Mahoney Leffers, Jennifer Gail Audette, Kevin S. Hardwick, William Van Cleve, 2018-07-31 A critical problem in resource scarce countries across the globe is the shortage of appropriately trained health care providers. According to the World Health Organization, the current global health workforce shortage of 7.2 million providers is estimated to increase to 12.9 million by 2035. This disproportionately affects resource scarce countries, denying basic health care to millions and limiting access to life saving treatments. Due to limited resources in these countries, not enough health professionals receive training; few have the opportunity for continuing education and the ability to develop or implement educational programs and curricula is constrained. Additionally, many existing providers choose to emigrate in pursuit of professional advancement opportunities, contributing to the overall shortage of qualified health care providers in these environments. Efforts to strengthen health workforce capacity not only increase access, safety, and availability of care but are critical to building resilient health systems capable of caring for the world's neediest populations. This requires not only cultivating new health care providers but also providing ongoing professional development to retain and support current providers, advancing the level of practice in accordance with current clinical science, cultivating educators, and enhancing training curricula. It is critical also to contribute to the limited body of research documenting the effectiveness and impact of various models of collaborative education and partnership to improve health worker training and retention. This Research Topic examines strategies for building health workforce capacity through the prism of educational partnerships, offering significant examples of effective models of international collaborative education as well as insight and guidance on the structure and operation of successful global partnerships. Collectively, the 31 articles accepted and included in this eBook represent a diversity of health professions and geographies across academic, non-governmental organizations, and other global partnership forms. The published manuscripts highlight various elements of partnerships with several consistent

themes emerging capacity building local empowerment mutual trust and respect long term commitment equity collaboration and the importance of integrating theory and practice for a balance of academic and clinical development The manuscripts provide examples of partnership and educational programs that are in the formative early stages of implementation and others which have been sustained long term some for decades The following eBook is divided into two parts with each part broken down into sections Part I of the eBook includes 18 manuscripts that showcase long term educational programs that strongly exemplify multiple foundational aspects of international partnerships in education including mutual collaboration and project management empowerment of host partners to lead and sustain programs and capacity building While individual manuscripts included in Part I look broadly at multiple aspects of successful international partnerships in education Part II manuscripts focus intently on one two elements Part II includes 13 articles that highlight partnership through short rather than long term educational initiatives as well as program development and broad academic partnerships This Research Topic was sponsored by Health Volunteers Overseas a United States based non profit that collaborates with over eighty international universities and health institutions to send volunteer health professionals to low resource countries to provide continuing education train the trainer courses professional support and consultation on academic program and curricula development **Malacologia** ,2015 **Yearbook of International Organizations 2014-2015 (Volume 4)** Union Of International Associations,Union of International Associations,2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available Detailed profiles of international non governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here In addition to the history aims and activities of international organizations with their events publications and contact details the volumes of the Yearbook include networks between associations biographies of key people involved and extensive statistical data Providing both an international organizations and research bibliography Volume 4 cites over 46 000 publications and information resources supplied by international organizations and provides nearly 18 000 research citations under 40 subject headings This volume also includes a research bibliography on international organizations and transnational associations *ICIS Chemical Business* ,2009 **The Lincoln Library of Essential Information an Up to Date Manual for Daily Reference, for Self Instruction, and for General Culture Named in Appreciative Remembrance of Abraham Lincoln, the Foremost American Exemplar of Self Education** ,1924 **The Publishers' Circular and Booksellers' Record** ,1919 **British Books** ,1916 *Publishers' Circular and Booksellers' Record of British and Foreign Literature* ,1916 **The Publisher** ,1916 **Annals of the Carnegie Museum** ,2013 **Behavioral Medicine A Guide for Clinical Practice 5th Edition** Mitchell D. Feldman,John F. Christensen,2019-12-06 The 1 guide to behavioral issues in medicine delivering thorough practical discussion of the full scope of the physician patient relationship This is an extraordinarily thorough useful book It manages to summarize

numerous topics many of which are not a part of a traditional medical curriculum in concise relevant chapters Doody's Review Service 5 stars reviewing an earlier edition The goal of Behavioral Medicine is to help practitioners and students understand the interplay between psychological physical social and cultural issues of patients Within its pages readers will find real world coverage of behavioral and interactional issues that occur between provider and patient in everyday clinical practice Readers will learn how to deliver bad news how to conduct an effective patient interview how to care for patients at the end of life how to clinically manage common mental and behavioral issues in medical patients the principles of medical professionalism motivating behavior change and much more As the leading text on the subject this trusted classic delivers the most definitive practical overview of the behavioral clinical and social contexts of the physician patient relationship The book is case based to reinforce learning through real world examples focusing on issues that commonly arise in everyday medical practice and training One of the significant elements of Behavioral Medicine is the recognition that the wellbeing of physicians and other health professionals is critically important to caring for patients
