**Digital Forensics and Cyber Crime** Pavel Gladyshev, Andrew Marrington, Ibrahim Baggili, 2014-12-22 This book constitutes the thoroughly refereed post-conference proceedings of the 5th International ICST Conference on Digital Forensics and Cyber Crime ICDF2C 2013 held in September 2013 in Moscow, Russia. The 16 revised full papers presented together with 2 extended abstracts and 1 poster paper were carefully reviewed and selected from 38 submissions. The papers cover diverse topics in the field of digital forensics and cybercrime, ranging from regulation of social networks to file carving, as well as technical issues, information warfare, cyber terrorism, critical infrastructure protection, standards, certification, accreditation, automation, and digital forensics in the cloud.

**Strategic Management: Competitiveness and Globalisation** Dallas Hanson, Michael A. Hitt, R. Duane Ireland, Robert E. Hoskisson, 2016-09-29 With an emphasis on global advantage, the text offers a comprehensive examination of regional and international issues to provide a complete, accurate, and up-to-date explanation of the strategic management process. New coverage on environmental concerns and emerging technologies, as well as examples and cases from Australia, New Zealand, and Asia Pacific, serve to engage students. While updated international content demonstrates how strategic management is used in the global economy, the text takes a resource-based approach which requires the examining of a firm's unique bundling of its internal resources. This text is appropriate for upper-level undergrad, usually third-year post-grad, in Masters courses.

**The De Gruyter Handbook of Automated Futures** Vaike Fors, Martin Berg, Meike Brodersen, 2024-09-23 How does automation affect us, our environment, and our imaginations? What actions should we take in response to automation? Beyond grand narratives and technology-driven visions of the future, what more can automation offer? With these questions in mind, *The De Gruyter Handbook of Automated Futures* provides a framework for thinking about and implementing automation differently. It consolidates automated futures as an inter- and transdisciplinary research field, embedding the imaginaries, interactions, and impacts of automation.

technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation

**Kindle Fire** Mohanbir S. Sawhney, Joseph R. Owens, Pallavi Goodman, 2017 This case is intended to illustrate to readers the challenges faced in 2011-2013 by Amazon's CEO Jeff Bezos as he guided his company into the exploding tablet market Faced with the tough decision between focusing on the e-reader market which Amazon had come to dominate with its Kindle product line and making a foray into tablets for which it had no expertise Bezos chose the latter Amazon sought to combine platform assets to create an end-to-end experience that would let users find a sweet spot in the mix of features and services This strategy involved critical decisions such as selecting a customer segment to target and a positioning for the new product dubbed the Kindle Fire as the tablet market rapidly evolved The Kindle Fire was designed to put the full Amazon experience right into the laps of customers and Bezos was betting that his customers would see the Kindle Fire as the physical manifestation of all things Amazon To achieve this Amazon was willing to heavily subsidize the Kindle Fire hardware device The key assumption was that the superior end-to-end experience Amazon had carefully created would lead to incremental purchases of content as well as physical products and services and the margins thus gained would outweigh the hardware subsidy Position and define target segments for a new product relative to competition as well as to a company's own products Articulate a competitor's strategy and how to compete against an incumbent with a disruptive business model and a differentiated position Discuss selling an experience as opposed to a product or device and how to create a differentiated service experience Determine pricing analyze business model and calculate revenue profit for a technology product
