Neither Snow Nor Rain Devin Leonard,2016-05-03 The book makes you care what happens to its main protagonist the U.S. Postal Service itself And as such it leaves you at the end in suspense USA Today Founded by Benjamin Franklin the United States Postal Service was the information network that bound far flung Americans together and yet it is slowly vanishing Critics say it is slow and archaic Mail volume is down The workforce is shrinking Post offices are closing In Neither Snow Nor Rain journalist Devin Leonard tackles the fascinating centuries long history of the USPS from the first letter carriers through Franklin's days when postmasters worked out of their homes and post roads cut new paths through the wilderness Under Andrew Jackson

the post office was molded into a vast patronage machine and by the 1870s over seventy percent of federal employees were postal workers As the country boomed USPS aggressively developed new technology from mobile post offices on railroads and airmail service to mechanical sorting machines and optical character readers Neither Snow Nor Rain is a rich multifaceted history full of remarkable characters from the stamp collecting FDR to the revolutionaries who challenged USPS s monopoly on mail to the renegade union members who brought the system and the country to a halt in the 1970s Delectably readable Leonard s account offers surprises on almost every other page and delivers both the triumphs and travails with clarity wit and heart Chicago Tribune *Buy Now* Emily West, 2022-02-22 How Amazon combined branding and relationship marketing with massive distribution infrastructure to become the ultimate service brand in the digital economy Amazon is ubiquitous in our daily lives we stream movies and television on Amazon Prime Video converse with Alexa receive messages on our smartphone about the progress of our latest orders In *Buy Now* Emily West examines Amazon s consumer facing services to investigate how Amazon as a brand grew so quickly and inserted itself into so many aspects of our lives even as it faded into the background becoming a sort of infrastructure that can be taken for granted Amazon promotes the comfort and care of its customers but not its workers to become the ultimate service brand in the digital economy West shows how Amazon has cultivated personalized intimate relationships with consumers that normalize its outsized influence on our selves and our communities She describes the brand s focus on speedy and seamless ecommerce delivery represented in the materiality of the branded brown box the positioning of its book retailing media streaming and smart speakers as services rather than sales and the brand s image control strategies West considers why pushback against Amazon s ubiquity and market power has come mainly from among Amazon s workers rather than its customers or competitors arguing that Amazon s brand logic fragments consumers as a political bloc West s innovative account the first to examine Amazon from a critical media studies perspective offers a cautionary cultural study of bigness in today s economy

Care-Centered Politics Robert Gottlieb, 2022-08-02 Why a care economy and care centered politics can influence and reorient such issues as health the environment climate race inequality gender and immigration This agenda setting book presents a framework for creating a more just and equitable care centered world Climate change pandemic events systemic racism and deep inequalities have all underscored the centrality of care in our lives Yet care work is for the most part undervalued and exploited In this book Robert Gottlieb examines how a care economy and care politics can influence and remake health climate and environmental policy as well as the institutions and practices of daily life He shows how through this care centered politics we can build an ethics of care and a society of cooperation sharing and solidarity Arguing that care is a form of labor Gottlieb expands the ways we think about home care child care elder care and other care relationships He links them to the Green New Deal Medicare for All immigration and the militarization of daily life He also provides perspective on the events of 2020 and 2021 including the COVID 19 pandemic climate change and movements calling

attention to racism and inequality as they relate to a care politics Care says Gottlieb must be universal whether healthcare for all care for the earth care at work or care for the household shared equally by men and women Care centered politics is about strategic and structural reforms that imply radical and revolutionary change Gottlieb offers a practical mindful yet also utopian politics of daily life **Urban Informatics** Wenzhong Shi,Michael F. Goodchild,Michael Batty,Mei-Po Kwan,Anshu Zhang,2021-04-06 This open access book is the first to systematically introduce the principles of urban informatics and its application to every aspect of the city that involves its functioning control management and future planning It introduces new models and tools being developed to understand and implement these technologies that enable cities to function more efficiently to become smart and sustainable The smart city has quickly emerged as computers have become ever smaller to the point where they can be embedded into the very fabric of the city as well as being central to new ways in which the population can communicate and act When cities are wired in this way they have the potential to become sentient and responsive generating massive streams of big data in real time as well as providing immense opportunities for extracting new forms of urban data through crowdsourcing This book offers a comprehensive review of the methods that form the core of urban informatics from various kinds of urban remote sensing to new approaches to machine learning and statistical modelling It provides a detailed technical introduction to the wide array of tools information scientists need to develop the key urban analytics that are fundamental to learning about the smart city and it outlines ways in which these tools can be used to inform design and policy so that cities can become more efficient with a greater concern for environment and equity
