Ambient Assisted Living Nuno M. Garcia, Joel J. P. C. Rodrigues, 2015 *Virtual Reality in Health and Rehabilitation* Christopher M. Hayre, Dave J. Muller, Marcia J. Scherer, 2020-12-22 This edited book focuses on the role and use of VR for healthcare professions in both health and rehabilitation settings. It also offers future trends of other emerging technology within medicine and allied health professions. This text draws on expertise of leading medical practitioners and researchers who utilise such VR technologies in their practices to enhance patient service user outcomes. Research and practical evidence is presented with a strong applied emphasis to further enhance the use of VR technologies within the community, the hospital and in education environments. The book may also be used to influence policymakers on how healthcare delivery is offered.

Assistive Technology Assessment Handbook Stefano Federici, Marcia Scherer, 2017-11-23 *Assistive Technology Assessment Handbook* Second Edition proposes an international ideal model for the assistive technology assessment process, outlining how this model can be applied in practice to reconceptualize the phases of an assistive technology delivery system according to the biopsychosocial model of disability. The model provides reference guidelines for evidence-based practice, guiding both public and private centers that wish to compare, evaluate and improve their ability to match a person with the correct technology model. This second edition also offers a contribution to the Global Cooperation on Assistive Technology (GATE) initiative, whose activities are strongly focused on the assistive products service delivery model. Organized into three parts, the handbook gives readers a toolkit for performing assessments, describes the roles of the assessment team members, among them the new profession of psychotechnologist, and reviews technologies for rehabilitation and independent living, including brain computer interfaces, exoskeletons, and technologies for music therapy. Edited by Stefano Federici and Marcia J. Scherer, this cross-cultural handbook includes contributions from leading experts across five continents, offering a framework for future practice and research.

Enhancing Healthcare and Rehabilitation Christopher M. Hayre, Dave J. Muller, 2019-03-29 *Summary Description* This book is primarily a celebration of the qualitative work undertaken internationally by a number of experienced researchers. It also focuses on developing the use of qualitative research for health and rehabilitative practitioners by recognizing its value methodologically and empirically. We find that the very nature of qualitative research offers an array of opportunities for researchers in being able to understand the social world around us. Further, through experience and discussion, this book identifies the multifaceted use of qualitative methods in the healthcare and rehabilitative setting. This book touches on the role of the researcher, the participants involved, and the research environment. In short, we see how these three central elements can affect the nature of qualitative work in attempts to offer originality. This text speaks to a number of audiences: Students who are writing undergraduate dissertations and research proposals may find the myriad of examples stimulating and may support the rationale for methodological decisions in their own work. For academics, practitioners, and prospective qualitative researchers, this book also aims to demonstrate an

array of opportunism in the field of qualitative research and how they may resonate with arguments proffered It is anticipated that readers will find this collection of qualitative examples not only useful for informing their own research but we also hope to enlighten new discussions and arguments regarding both methodological and empirical use of qualitative work internationally Features Encompasses the importance of qualitative research and how it can be used to facilitate healthcare and rehabilitation across a wide range of health conditions Evaluates empirical data whilst critically applying it to contemporary practices Provides readers with an overview with future directions and influence policy makers in order to develop practice Focuses on an array of health conditions that can affect groups of the population coincided with life issues and the care and family support received Offers innovative methodological insights for prospective researchers in order to add to the existing evidence base
