comprehensive chapters on general topics and topics relevant to multiple taxa. Several new topics are presented including wildlife health in Australia and the important role veterinarians play in Australia's biosecurity systems, medical aspects of native mammal reintroductions and translocations, disease risk analysis, wildlife rehabilitation practices in Australia with an emphasis on welfare of animals undergoing rehabilitation, management of overabundant populations, immunology and stress physiology. The second section provides updates on current knowledge relevant to specific taxa. Several appendices provide useful reference data and information on clinical reference ranges, recommended venipuncture sites, chemical restraint agent doses and regimens, a drug formulary and dental charts. Written by Australian experts, *Current Therapy in Medicine of Australian Mammals* is clinically oriented with emphasis on practical content with easy to use reference material.
