Business Dancing with Sophia Michael Schwartz, Sean Esbjörn-Hargens, 2019-11-01 Explores the philosophical dimensions and implications of integral theory. Dancing with Sophia is the first book of essays to focus on the philosophical dimensions and implications of integral theory. A metatheory that organizes first-order theories and disciplines into higher-order modes of knowing and insight needed to address the complexity of today's world, integral theory has already impacted a wide range of disciplines from psychology to business to religious studies to art. Included here are perspectives by scholars in the continental, comparativist, and process traditions who dive into integral theory's postmetaphysical claims in order to mine, extend, and critique its philosophical merits. On the verge of its own emergence, integral philosophy promotes modes of creative critical thought oriented toward the multidimensional flourishing of planetary well-being, and Dancing with Sophia will be of interest to scholars in philosophy, religious studies, transpersonal, developmental, and humanist psychology, and more. Integral theory is a bold and provocative endeavor. It challenges one to think past the norm, to sail beyond the horizon, and risk encountering the Scylla and Charybdis of what is academically acceptable or at least familiar, and what is possible in ways that only are now beginning to dawn on both thinking and dwelling. If it is nothing else, integral theory is the movement beyond the purely intellectual into the lived experience. This is its meta-dimension properly understood. Foreword by Brian Schroeder.

Re-Engineering Humanity Brett Frischmann, Evan Selinger, 2019-09-12 Every day new warnings emerge about artificial intelligence rebelling against us. All the while, a more immediate dilemma flies under the radar. Have forces been unleashed that are thrusting humanity down an ill-advised path, one that's increasingly making us behave like simple machines? In this wide-reaching interdisciplinary book

Brett Frischmann and Evan Selinger examine what's happening to our lives as society embraces big data predictive analytics and smart environments. They explain how the goal of designing programmable worlds goes hand in hand with engineering predictable and programmable people. Detailing new frameworks, provocative case studies and mind-blowing thought experiments, Frischmann and Selinger reveal hidden connections between fitness trackers, electronic contracts, social media platforms, robotic companions, fake news, autonomous cars, and more. This powerful analysis should be read by anyone interested in understanding exactly how technology threatens the future of our society and what we can do now to build something better.
