## **Bouncebacks Emergency Department Cases Ed Returns:**

Bouncebacks! Michael B. Weinstock, Ryan Longstreth, Gregory L. Henry, 2006 Case based for most effective learning and retention Bouncebacks helps emergency physicians sharpen their analytical skills to improve their diagnostic ability in preparing for emergency medicine board exams The format is the actual documentation of 30 ED patients who were sent home and then bounced back to receive a different diagnosis Although patients in these cases were not entirely mismanaged often important red flags were missed or ignored Bouncebacks helps emergency medicine physician learn to organize their thoughts and analyze cases in a logical manner The cases are structured to help the reader simulate the process of analysis used in actual practice After reviewing the initial visit Gregory L Henry provides commentary on patient evaluation The final visit is presented and each case ends with a referenced discussion of the initial complaint and eventual diagnosis by leaders in the field of Emergency Medicine Case Studies in Emergency Medicine Colin G. Kaide, Christopher E. San

Miguel, 2019-11-14 This book contains a variety of medical case studies from actual patients presenting to the emergency department It includes not only typical cases that present to the ED but also less common yet very important cases that one can't afford to miss Each chapter begins with a case or set of cases with typical and atypical aspects of the disease in question This is followed by high value learning points on the condition with introductory background points physiology and pathophysiology of the disease how to make the diagnosis and finally how to initiate treatment The cases provide expert discussion with tips and tricks personal experience with management of each of the cases and a follow up description of the outcome of the cases to provide the reader with closure To supplement each case study all 67 chapters include a pattern recognition component that identifies the key diagnostic features of the disease discussed The chapters conclude with a summary of the diagnostic and treatment details of each condition Using a concise easy to read bulleted format the book helps readers to learn evaluate adopt new practices right now LEARN Emergency Medicine Case Studies LEARNing Rounds Learn Evaluate Adopt Right Now is an essential resource for a variety of emergency medicine clinicians including experienced physicians residents physician assistants nurse practitioners nurses and medical students rotating in the emergency department Finally this book can be used as a basis for small group discussions especially in emergency medicine training programs **Bouncebacks! Critical Care** Michael B. Weinstock, Kevin M. Klauer, 2021-07-13 This edition of

Bouncebacks Emergency Medicine books examines the bounceback visit putting the reader in the footsteps of the clinician as the patient deteriorates The story pauses at important decision points as possible management strategies are reviewed in a literature based fashion followed by a revelation of the path chosen by the actual provider As the patient's course progresses we reach additional decision points and address further clinical questions In addition to our chapter authors many with expertise in critical care emergency medicine we have an all star lineup of expert whisperers first an EM critical care section editor below and second EMCRIIT.org's double boarded critical care guru Scott Weingart Their comments are inserted in

grey boxes and are intended to give tips and tricks borne of experience and to provide context to the literature as if they are standing over our shoulder and advising during a resuscitation. Additionally, there are three chapters where we address the medical legal aspects of care. Enter Greg Henry MD, past president of The American College of Emergency Physicians (ACEP) and one of the most experienced physician medical legal experts in the country. He opines on the approach that both the defense and plaintiff would likely pursue and, by extension, how we can make patients safer through our evaluation and documentation before there is an adverse outcome. Whereas these chapters contain the actual documentation from the ED chart, a very few chapters have slight modifications to the final aspects of the return visit at decision point 3 to allow for exploration of different critical care scenarios. There is still plenty of commentary on the documentation missed red flags and what could have been done to improve care at the initial visit. Our goal is to make each chapter challenging, dynamic, and realistic to move us from standard of care to excellence in care.

**Testing for the Role of Prejudice in Emergency Departments Using Bounceback Rates** Shamena Anwar,2015 We propose and empirically implement a test for the presence of racial prejudice among emergency department ED physicians based on the bounceback rates of the patients who were discharged after receiving diagnostic tests during their initial ED visits A bounceback is defined as a return to the ED within 72 hours of being initially discharged Based on a plausible model of physician behavior we show that differential bounceback rates across patients of different racial groups who are discharged after receiving diagnostic tests from their ED visits are informative of the racial prejudice of the physicians Applying the test to administrative data of ED visits from California and New Jersey we do not find evidence of prejudice against black and Hispanic patients Our finding suggests that at least in the emergency department setting taste based discrimination does not play an important role in the racial disparities in health care
