included and explained to support evaluation and analysis of the use of online learning in other settings The book questions accepted views of the place of technologies in higher education arguing that there has been a repeated cycle of hype and disappointment accompanying the development of online learning While much research has documented this cycle finding new strategies to break it has proved to be a more difficult challenge Why has technology not made more impact Are lecturers going to be left behind by their own students in the use of digital technologies Why have we seen costly and time consuming failures This book argues that we can answer these questions by heeding the lessons from previous experiences with the VLE and early iterations of the MOOC More importantly we can begin to ask new and different questions for the future to ensure better outcomes for our institutions and ultimately our learners Presents institution wide analysis of the adoption of a key educational technology for higher education validated across multiple sites to support deeper understanding of the use of learning technologies in context Describes Activity Theory and presents a replicable model to operationalise it for investigations of the use of online learning in higher education and other settings Provides a unique perspective on the historical experience of VLE adoption and mainstreaming to identify important insights and essential lessons for the future   Routledge Encyclopedia of Technology and the Humanities Chan Sin-wai,Mak Kin-wah,Leung Sze Ming,2024-04-29 Routledge Encyclopedia of Technology and the Humanities is a pioneer attempt to introduce a wide range of disciplines in the emerging field of techno humanities to the English reading world This book covers topics such as archaeology cultural heritage design fashion linguistics music philosophy and translation It has 20 chapters contributed by 26 local and international scholars Each chapter has its own theme and addresses issues of significant interest in the respective disciplines References are provided at the end of each chapter for further exploration into the literature of the relevant areas To facilitate an easy reading of the information presented in this volume chapters have been arranged according to the alphabetical order of the topics covered This Encyclopedia will appeal to researchers and professionals in the field of technology and the humanities and can be used by undergraduate and graduate students studying the humanities   Handbook of Design in Educational Technology Rosemary Luckin,Sadhana Puntambekar,Peter Goodyear,Barbara L Grabowski,Joshua Underwood,Niall Winters,2013-06-26 The Handbook of Design in Educational Technology provides up to date comprehensive summaries and syntheses of recent research pertinent to the design of information and communication technologies to support learning Readers can turn to this handbook for expert advice about each stage in the process of designing systems for use in educational settings from theoretical foundations to the challenges of implementation the process of evaluating the impact of the design and the manner in which it might be further developed and disseminated The volume is organized into the following four sections Theory Design Implementation and Evaluation The more than forty chapters reflect the international and interdisciplinary nature of the educational technology design research field   **Triangles and Tribulations** Clay Spinuzzi,2025-06-17 How the sociology of translation can help us understand a social

science framework cultural historical activity theory CHAT as a set of uneasy settlements that both further and betray their original intentions How do social science frameworks get taken up and spread In Triangles and Tribulations Clay Spinuzzi uses the sociology of translation to reread the history of one such framework cultural historical activity theory CHAT CHAT originated in the 1920s and 1930s work of Soviet psychologists in the Vygotsky Circle with its key insight mediation depicted in a simple triangular diagram drawn by Lev Vygotsky From there CHAT was developed and popularized by international scholars including Finnish researcher Yrj Engestr m who used Vygotsky s triangle as a basis for his own Through this progressive development CHAT carried on the work of its forebears building on their foundations or so we are sometimes encouraged to understand these transformations But each such translation Spinuzzi argues is also a betrayal Each innovation opens new possibilities for CHAT but also disrupts a previous settlement Examining specific points in CHAT s history Spinuzzi reviews how CHAT has been applied to different domains in service to different projects and evaluated through different trials undergoing rhetorical transformations These translations sedimented as a series of settlements have allowed it to persist as a social science approach and develop as a framework for workplace studies But they have also involved accumulating concepts and terms from various social sciences yielded radical changes in scope and led to ongoing disputes about what constitutes its unit s of analysis In examining CHAT s triangles Spinuzzi considers how social science frameworks live through practice and dialogue so that they can continue becoming meaningful to others *Handbook of Research on Educational Communications and Technology* J.
