Systems ,2002   **American Book Publishing Record Cumulative 1998** R R Bowker Publishing,1999-03   <u>Rules in Database Systems</u> Norman W. Paton,M.Howard Williams,2012-12-06 This book is the proceedings of a workshop held at Heriot Watt University in Edinburgh in August 1993 The central theme of the workshop was rules in database systems and the papers presented covered a range of different aspects of database rule systems These aspects are reflected in the sessions of the workshop which are the same as the sections in this proceedings Active Databases Architectures Incorporating Temporal Rules Rules and Transactions Analysis and Debugging of Active Rules Integrating Graphs Objects with Deduction Integrating Deductive and Active Rules Integrity Constraints Deductive Databases The incorporation of rules into database systems is an important area of research as it is a major component in the integration of behavioural information with the structural data with which commercial databases have traditionally been associated This integration of the behavioural aspects of an application with the data to which it applies in database systems leads to more straightforward application development and more efficient processing of data Many novel applications seem to need database systems in which structural and behavioural information are fully integrated Rules are only one means of expressing behavioural information but it is clear that different types of rule can be used to capture directly different properties of an application which are cumbersome to support using conventional database architectures In recent years there has been a surge of research activity focusing upon active database systems and this volume opens with a collection of papers devoted specifically to this topic   <u>Embedded Software</u> ,2003   <u>Rules in Database Systems</u> Timos Sellis,1995-09-11 This book constitutes the refereed proceedings of the Second International Workshop on Rules in Database Systems RIDS 95 held in Athens Greece in September 1995 The book presents 22 revised full papers selected during a very careful reviewing process from a total of 47 submissions In addition there is a detailed invited introduction for a panel discussion on the Active Database Management Systems Manifesto The papers are organized in sections on semantics for database systems active behavior rule base organization and modeling rule analysis deductive databases implementation and benchmarking of active database systems and cooperative systems support   **Proceedings of the Twenty-fourth International Conference on Very Large Databases, New York, NY, USA, 24-27 August, 1998** Ashish Gupta,Oded Shmueli,Jennifer Widom,1998
